The Eclipse Project Tom Tucker,2000 *The P-38 Lightning and the Men Who Flew It* Wolfgang W. E. Samuel,2025-04-15 The P 38 Lightning was one of the fastest operational fighters of World War II famous for its successes in North Africa and the Pacific In *The P 38 Lightning and the Men Who Flew It* Wolfgang W E Samuel shares the stories of the young men who climbed into the cockpits of the P 38 to fight for freedom and of those who created tested and deployed these fearsome machines The P 38 was the product of the Lockheed Corporation the first fighter they ever built principally conceptualized by Kelly Johnson whose design was to meet Air Corps specifications To do that he came up with a twin engine aircraft with a tricycle landing gear unlike any other military aircraft of the time But it was no easy plane to fly Many pilots died in training and routine flying before ever meeting an opponent in combat P 38 units were formed quickly once the United States entered World War II in December 1941 Training was rushed to get pilots and planes to Europe as quickly as possible to serve as bomber escorts Although the P 38 could fly at the high altitudes the bombers flew it was not the right aircraft for the mission Without an engine in front of the cockpit to keep the pilot warm the plane was frigid Pilots suffered and were sometimes so weakened by the brutal cold that they had to be lifted out of the cockpit upon landing and the bombers suffered severe losses In North Africa s warmer air however the P 38 came into its own With four 50 caliber machine guns and a 20mm cannon in its nose the P 38 was a formidable adversary With proven success in the Mediterranean P 38 squadrons were transferred to the Pacific Theater where they flourished Focusing on the men who flew this challenging aircraft and the men who designed and decided how to deploy it Samuel shares stories of bravery and ingenuity alongside an aviation history long neglected The P 38 s deployment is covered in some detail including the actions of Richard Bong who became the US forces ace of aces In the Pacific skies the P 38 its pilots and designers made the heroic history captured here

Silent Warriors, Incredible Courage Wolfgang W. E. Samuel,2019-02-19 The outbreak of the Korean War in June 1950 took the American military by surprise Rushing to respond the US and its allies developed a selective overflight program to gather intelligence Silent Warriors Incredible Courage is a history of the Cold War overflights of the Soviet Union its allies and the People s Republic of China based on extensive interviews with dozens of pilots who flew these dangerous missions In 1954 the number of flights expanded and the highly classified SENSINT program was born Soon American RB 45C RB 47E H RF 100s and various versions of the RB 57 were in the air on an almost constant basis providing the president and military leadership with hard facts about enemy capabilities and intentions Eventually the SENSINT program was replaced by the high flying U 2 spy plane The U 2 overflights removed the mysteries of Soviet military power These flights remained active

until 1960 when a U 2 was shot down by Russian missiles leading to the end of the program Shortly thereafter planes were replaced by spy satellites The overflights were so highly classified that no one planner or participant was allowed to talk about them and no one did until the overflight program and its pictorial record was declassified in the 1990s Through extensive research of existing literature on the overflights and interviews conducted by Wolfgang W E Samuel this book reveals the story of the entire overflight program through the eyes of the pilots and crew who flew the planes Samuel s account tells the stories of American heroes who risked their lives and sometimes lost them to protect their country
