Testifying With Impact:

Traumatised Witnesses in International Criminal Trials Suzanne Schot, 2024-02-13 This book focuses on the testimonial evidence of traumatised witnesses in trials of international crimes which deal with acts of genocide war crimes and crimes against humanity Such trials often involve the testimonies of those who experienced or witnessed extremely traumatic events which can make it hard for these witnesses to recall specific details Testifying during trial may in itself also pose challenges to their well being Yet the legal process of determining whether someone can be held criminally responsible for the alleged crimes needs to be fair in accordance with the right to a fair trial of the accused and the facts need to be determined as accurately as possible This book argues that to ensure fair and accurate fact finding when in particular traumatised witnesses testify a balance needs to be struck between the needs of witnesses who testify about traumatic experiences the fair trial rights of the accused and the objective of the court to establish as accurately as possible the responsibility of the accused This is crucial throughout the stages of selecting preparing presenting and assessing the testimonial evidence of traumatised witnesses The methodology involves an analysis of transcripts of proceedings and case law of the International Criminal Tribunal for the former Yugoslavia the International Criminal Court and Dutch courts prosecuting international crimes The research demonstrates that it is often difficult to strike a balance between the competing objectives during proceedings when traumatised witnesses testify due to the current lack of regulations and guidelines applicable during investigations and prosecutions This book shows that this balance can and should be achieved when traumatised witnesses testify during criminal proceedings for international crimes The work is an invaluable resource for researchers academics and practitioners in criminal law criminology legal psychology legal psychiatry social anthropology and forensic sciences

The Emotional Effects of Testifying on Sexually Abused Children ,1994 *The Palgrave Handbook of Testimony and Culture* Sara Jones, Roger Woods, 2023-04-19 This Palgrave Handbook examines the ways in which researchers and practitioners theorise analyse produce and make use of testimony It explores the full range of testimony in the public sphere including perpetrator testimony testimony presented through social media and virtual reality A growing body of research shows how complex and multi layered testimony can be how much this complexity adds to our understanding of our past and how creators and users of testimony have their own complex purposes These advances indicate that many of our existing assumptions about testimony and models for working with it need to be revisited The purpose of this Palgrave Handbook is to do just that by bringing together a wide range of disciplinary theoretical methodological and practice based perspectives

Research Handbook on Law and Emotion Susan A. Bandes, Jody L. Madeira, Kathryn D. Temple, Emily Kidd White, 2021-04-30 This illuminating Research Handbook analyses the role that emotions play and ought to play in legal reasoning and practice rejecting the simplistic distinction between reason and emotion *Children at Risk* Robert T. Ammerman, Michel Hersen, 2013-03-09 During the past decade a dramatic increase in research and clinical interest has risen

in child abuse and neglect This recent growth in awareness is due at least partly to the alarming statistics documenting the incidence of child maltreatment Almost one million children are reported to be abused and neglected each year and many experts believe that this figure underestimates the true incidence Indeed recent surveys suggest that almost 1.5 million children are the targets of domestic violence every year A significant proportion of these children die as a function of this maltreatment whereas the remainder suffer a variety of short and long term deleterious medical and psychosocial consequences Child maltreatment is a universal problem that has precipitated a mobilization of effort from a variety of disciplines including psychology medicine psychiatry social work sociology and criminology Particular attention has been directed toward the prevention and treatment of child abuse and neglect Such endeavors require the screening of large groups in order to identify families that are at high risk for engaging in such behavior Delineating those characteristics that differentiate high from low risk families and children is one of the obvious priorities for researchers and clinicians in the future This book therefore carefully considers the status of research on risk factors of abuse and neglect in children Adduced data undoubtedly will have practical value for subsequent intervention efforts
