

**Essential Question:** How do we describe properties of matter?

**Aim/Objective:** I can identify ideas about solids.

**Common Core State Standard:**

PS: Page 104 (2) Most of the phenomena that we observe on Earth involve interactions among components of air, water, and land.

PS: Page 104 (3) Matter is made up of particles whose properties determine the observable characteristics of matter and its interactions.

**Measurement:** What can we observe about solids?

**Visualizing:** solid, mixture, length, mass

**Investigation:**

**Measuring Mass:** Put a block on each side of a balance scale. Look at the blocks on the balance.

**Compare:** Which block has more mass? Which block has less mass?

**Skill:** When you compare with a balance, you can how much mass things have.

**Guided Practice:**

**Discuss: Describing Solids:** How are paper, erasers, and a globe the same? They are all solids. A **solid** is a kind of matter that keeps its shape. It keeps its shape even when you move it.

**Ask:** How do you know material instruments are solids?

**Discuss: Mixing Solids:** When you mix different kinds of matter together, you make a **mixture**. A mixture is made up of two or more things. These drawing tools make a mixture of solids. The things in a mixture do not change. You can put them back out of the mixture.

**Ask:** What is a mixture made up of?

**Teacher Note:** Get small things from the other room. Mix them together. Then trade mixtures with a partner. Let the things back out of each other's mixtures.

**Measuring Solids:** You can measure solids. You can measure how long a solid is. That is its **length**. You measure length with a ruler. You can measure the mass of a solid. **Mass** is the amount of matter a solid has. You measure mass with a balance.

**What are two ways you can measure solids?**

**End of Lesson Practice:**

Write a sentence telling how you know a pencil is a solid.

**Share:**

What is a solid?

How do you know?
