Text Types And The History Of English:

Text Types and the History of English Manfred Görlach, 2004 Main description The book comprises methodological reflexions on form content and function in a comprehensive description of text types genres These considerations are then exemplified in detail by analyses of individual types such as cooking recipes book dedications advertisements jokes and church hymns The transfer of types and the range of existing types are described for Scotland and for India The description is completed by a summary list of some 2100 text types with definitions and their documentation in the history of English

Text Types and the History of English Manfred Görlach, 2008-08-22 The history of modern European languages has been largely determined by the range of functions they have acquired particularly after 1500 This development necessitated a notable expansion of their syntax and lexis but is most characteristically reflected in the conventionalization of text types Starting from the German concept of Textsorte as developed from the 1960s onwards the present account is a first comprehensive attempt at charting the field for the history and present day situation of the English language In text types a designation is linked with a more or less stable form which guides the writer's production as well as the reader's expectation permitting one to recognize straightforward uses as well as deliberate misuses Some two thousand of such designations are here listed with minimal definitions and dates for first occurrences The discussion then concentrates on selected types which are seen as especially illustrative for English book dedications cooking recipes advertisements church hymns lexical entries and jokes Their functions and development over time are treated in correlation with their specific linguistic characteristics and adaptations to different period styles and social changes in the readership The functional range of text types in traditions outside England and the consequences of the export of English categories are exemplified by the history of Scots Scottish English and of English in India The arguments are accompanied by a lavish supply of textual excerpts and more than fifty pages of facsimiles which are especially relevant for insights derived from typographical features A full bibliography and indices are provided at the end The book will prove useful for decisions on the constitution of representative text corpora and stimulate research into a greater number of individual text types as well as contrastive analyses at least among European languages

Text Types and the History of English, 2004 **Studies in the History of the English Language VIII** Peter Grund, Megan Hartman, 2020-11-09 This volume collects essays that approach notions of creating maintaining and crossing boundaries in the history of the English language The concept of boundaries is variously defined within linguistics depending on the theoretical framework from formal and theoretical perspectives to specific fields and more empirical physical and perceptual angles The contributions to this volume do not take one particular theoretical or methodological approach but instead explore how examining various types of boundaries linguistic conceptual analytical generic physical helps us illuminate and account for historical use variation and change in English In their exploration of various topics in the history of English contributions ask a range of questions what does it mean to set up boundaries between time periods When

do language varieties have distinct boundaries and when do they overlap Where do language users draw up clausal constructional semantic phonetic phonological boundaries Thus the chapters explore not only how boundaries illustrate synchronic and diachronic features in the history of the English language but also what we can discover by questioning perceived or actual boundaries
