Textbook Of General Psychology:

A Textbook of General Psychology, [with] Student Guide Walter F. Daves, George W. O'Neill, William M. Walters, 1975

Textbook of General Psychology Robert V. Heckel, 1966 Handbook of General Psychology, 1942 *General Psychology* Walter Samuel Hunter, 1919 *An Introduction to General Psychology* Robert Morris Ogden, 2015-06-02
Excerpt from *An Introduction to General Psychology* The preface of a book is usually an apology for its existence This one is no exception to the rule The large number of already available text books in Psychology makes pertinent the question Why another In attempting to justify the appearance of this one I would first call attention to the need of a growing science such as Psychology for constant revision and the envisagement of its problems from various angles This has doubtless been the occasion for many of the texts which we already have The chief motives for the writing of the present book were two The first of these was to supply a general elementary text book which would meet the demands of the average student beginner a little more adequately than has been done hitherto After ten years experience in teaching a first course in Psychology I have become convinced that the mode of attack usually followed fails to supply the student with the sort of introduction into the science of mind that will enable him on the one hand to connect his Psychology with everyday life and on the other hand to apprehend the bearings of this science upon Philosophy Education Sociology and Biology About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Textbook of General Psychology Robert V. Heckel, Lelon J. Peacock, Robert E. McCarter, 1967 *General psychology* Joy Paul Guilford, 1947 Readings in General Psychology Edward Stevens Robinson, 1923 We are publishing this volume in the belief that the student beginning the study of psychology can profitably read much more material than is commonly assigned him It is hardly the purpose of a first course to train the student to such a point that he can read the technical articles of the psychological journals but he should have enough practice to enable him to read with intelligence the more general literature of the subject whatever its point of view But the accomplishment of even this latter purpose is becoming

increasingly difficult Our elementary courses contain so many students that library assignments are in many cases all but impossible In light of this fact we feel that instructors will welcome a single volume which contains an ample and representative supply of reading materials Such a volume has an advantage over a library reserve shelf in that the students will not be discouraged by being unable to reach their assignments when and where they find it convenient to study It has an advantage over a second textbook in that it contains more than another often conflicting system of description In those cases where the instructor is interested in presenting his own system this volume will furnish reading materials which will be useful without coming into constant conflict with the lectures While we do not believe that differences of opinion should be hidden from the student we are convinced that constant conflict between instructor and text is very bad from a pedagogical standpoint We have chosen these readings for the beginning student and we hope that few of them will be beyond his comprehension Now and again terms appear in the readings which have not previously been defined Usually where the meaning of such terms cannot be inferred from the context we have defined them in footnotes It is no disadvantage however if the student is occasionally forced to use a dictionary The exercises included with the readings are not in most cases questions the answers to which can be taken directly from the text Rather they are problems which the student should be in a position to attack when he has mastered a given reading or group of readings In many cases these exercises are designed to bring out important points with which the readings do not happen to deal In other cases they are designed to bring up problems which will hardly be solved by either instructor or student but which may profitably be discussed Where suitable materials could be found in the sources we have used them Where these sources were too technical too long or too saturated with dead issues we have taken more suitable restatements We have exercised considerable freedom in using certain excerpts which are not particularly representative of the writers from whom they are taken While we have made slight changes in many of the selections these changes are practically all of two kinds First sentences or words have been eliminated in order to avoid issues which could not be discussed at length and which we did not feel could be handled justly in a very brief way Second sentences or words have been modified or eliminated in order to disconnect a selection from its original setting In neither of these cases we feel sure have meanings been attributed to an author which he himself did not intend While we have arranged the contents of this volume along conservative lines the readings can be taken up in almost any order We have put side by side passages written from different points of view and though we believe the student should get used to these differences and learn to see beyond them there is no reason why the instructor should not emphasize certain facts and theories by a judicious choice from among these materials
