Jansson, 2002-09-04 Choices about budget priorities are arguably the most important made by the federal government profoundly affecting the well being of citizens Bruce Jansson documents how presidents from FDR to Clinton have made ill advised choices that wasted trillions of dollars Going beyond charges of corruption or bureaucratic waste the book is an eye opening expos revealing innumerable useless projects military as well as civilian unnecessary tax concessions and the use of interest payments to cover deficit spending among other costly mistakes Using Office of Management and Budget projections through 2004 Jansson shows how the madness continues and how an informed electorate can put an end to it **Prophets**

handle the demand for a continuously growing energy consuming public nuclear is an obvious solution This book is a must have for any engineer working in nuclear power students hoping to go into that industry and other engineers and scientists interested in the subject This book is both technical and political because they re equally important in determining what actually happens in institutions dealing with technical problems
