*A History of the Hausa Language* Paul Newman, 2022-03-31 Written by the world's leading expert on Hausa this book provides a lucid and comprehensive linguistic history of the language highlighting changes in phonology tonology morphology grammar and lexicon It is an invaluable resource for specialists in African and Afroasiatic languages as well as general historical linguists and typologists

Articles in the World's Languages Laura Becker, 2021-09-20 This study provides a systematic overview of articles and article systems in the world's languages using a sample of 104 languages Articles can be classified into 10 types according to their referential functions definite anaphoric weak definite recognitional indefinite presentational exclusive specific nonspecific inclusive specific and referential articles All 10 types are described in detail with examples from various languages of the world The book also addresses crosslinguistic trends concerning the distribution and the development of different article types and it proposes a typology of article systems The aim of this study is to provide a general crosslinguistic overview concerning the attested properties and distributions of articles It is geared towards readers with interests in language typology and the nominal domain and it can serve as a point of reference for language specific studies of articles or determiners

**Negation Patterns in West African Languages and Beyond** Norbert Cyffer, Erwin Ebermann, Georg Ziegelmeyer, 2009-08-27 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east The first aim is to provide data on various aspects of negation in African languages Although the topics addressed here reflect a great diversity of negation patterns the following typological features have been identified to be

prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent *Studies in African Linguistic Typology* F. K. Erhard Voeltz, 2006-03-22 The twenty one papers that make up this volume reflect the broad perspective of African linguistic typology studies today Where previous volumes would present language material from a very restricted area and perspective the present contributions reflect the global interest and orientation of current African linguistic studies The studies are nearly all implicational in nature Based upon a detailed survey of a particular linguistic phenomenon in a given language or language area conclusions are drawn about the general nature about this phenomenon in the languages of Africa and beyond They represent as such a first step that may ultimately lead to a more thorough understanding of African linguistic structures This approach is well justified Taking the other road attempting to pick out linguistic details from often fairly superficially documented languages runs the risk that the data and its implications for the structure investigated might be misunderstood Consequentially only very few studies of this nature giving the very broad perspective the overview of a particular structure type covering the whole African continent are represented here **Verbal Plurality and Distributivity** Patricia Cabredo Hofherr, Brenda Laca, 2012-10-01 This volume brings together novel analyses of verbal plurality and distributivity The contributions draw on a wide range of new empirical data from languages as diverse as Arabic Cusco Quechua European Portuguese Hausa Karitiana Modern Hebrew and Russian The introductory chapter gives an overview of the central issues that underlie much recent research on the semantics of event plurality The papers on verbal plurality explore the interaction between verbal plurality and plural arguments in Arabic and European Portuguese the semantics of additive particles in Modern Hebrew the semantics of a range of pluractional markers in Cusco Quechua and the morphological variability of pluractional markers cross linguistically The papers on distributivity examine the syntax and semantics of reduplicated numerals in Karitiana and adnominal distributive markers This volume will be of interest to researchers and students in syntax formal semantics and language typology *A Guide to Gender and Classifiers* Alexandra Y. Aikhenvald, 2025-03-21 This book explores the range of noun categorization devices found in the languages of the world from the numeral classifier systems of Southeast Asia to the highly grammaticalized gender agreement classes in Indo European languages It shows how these devices provide unique insights into how people categorize the world through the language **Standard Negation** Matti Miestamo, 2008-08-22 This book is the first cross linguistic study of clausal negation based on an extensive and systematic language sample Methodological issues especially sampling are discussed at length Standard negation the basic structural means languages have for negating declarative verbal main clauses is typologized

from a new perspective paying attention to structural differences between affirmatives and negatives In symmetric negation affirmative and negative structures show no differences except for the presence of the negative marker *s* whereas in asymmetric negation there are further structural differences i e asymmetries A distinction is made between constructional and paradigmatic asymmetry in the former the addition of the negative marker *s* is accompanied by further structural differences in comparison to the corresponding affirmative and in the latter the correspondences between the members of verbal etc paradigms used in affirmatives and negatives are not one to one Cross cutting the constructional paradigmatic distinction asymmetric negation can be further divided into subtypes according to the nature of the asymmetry Standard negation structures found in the 297 sample languages are exemplified and discussed in detail The frequencies of the different types and some typological correlations are also examined Functional motivations are proposed for the structural types symmetric negatives are language internally analogous to the linguistic structure of the affirmative and asymmetric negatives are language externally analogous to different asymmetries between affirmation and negation on the functional level Relevant diachronic issues are also discussed The book is of interest to language typologists descriptive linguists and to all linguists interested in negation

**Morphosyntax** William Croft, 2022-08-04 Taking a functional approach this book provides a thorough overview of Morphosyntax and sets out a framework for syntactic constructions

Morphology Jeffrey P. Punske, 2023-10-31 The first comprehensive morphology textbook written in the framework of Distributed Morphology firmly grounded in cross linguistic theory Distributed Morphology is the theoretical framework that views morphology as syntactic proposing that there is no divide between the construction of words and the construction of sentences The first text of its kind Morphology A Distributed Morphology Introduction provides a thorough overview of Distributed Morphology using data and problem sets from a diverse selection of the world's languages Divided into two parts this valuable resource begins by describing the basics of morphology and then moves into an exploration of more advanced topics in morphology including morphosyntactic operations cyclic derivation the Mirror Principle and non compositional language Each chapter includes a glossary of key terms learning objectives further readings and illustrative examples to reinforce learning Exercises and problem sets encourage students to develop their understanding and build confidence in the application of theory to practice Through this valuable text students will develop comprehension in morphological parsing and glossing the concept of the lexicon the different types of morphemes the idea of paradigms the basic practice of morphological analysis and more Offering detailed yet accessible coverage of morphological theory from the perspective of Distributed Morphology this textbook Introduces the methodology used in morphology the basic assumptions of Distributed Morphology and key concepts from lexical grammatical approaches to language Covers essential phonology feature interaction paradigms as linguistic objects core ideas of syntax and syntactic derivation and derivation and inflection in Distributed Morphology Includes a Quick Reference Guide with glossing abbreviations from the Leipzig Glossing Rules a full IPA chart with instructions and charts of

phonological features Provides access to a companion website containing solutions to problem sets and additional instructor resources Morphology A Distributed Morphology Introduction is the ideal textbook for advanced undergraduates and graduate students in morphology courses or with an interest in specializing in morphology Offering students an unparalleled overview of this growing field of morphology this text will ensure that developing morphologists are well equipped to employ the latest methods in Distributed Morphology to their own research and study *Morphological Perspectives* Baerman Matthew Baerman,2019-04-17 In a field still dominated by syntactic perspectives it is easy to overlook the words that are the irreducible building blocks of language Morphological Perspectives takes words as the starting point for any questions about linguistic structure their form their internal structure their paradigmatic extensions and their role in expressing and manipulating syntactic configurations With a team of authors that run the typological gamut of languages this book examines these questions from multiple perspectives both the canonical and the non canonical By taking these questions seriously and letting loose a full battery of analytical techniques the following chapters not only celebrate the pioneering work of Greville G Corbett but present new thinking on traditional approaches including the paradigm deponency and morphological features

*The Negative Existential Cycle* Ljuba Veselinova,Arja Hamari,2022-12-20 In 1991 William Croft suggested that negative existentials typically lexical expressions that mean not exist not have are one possible source for negation markers and gave his hypothesis the name Negative Existential Cycle NEC It is a variationist model based on cross linguistic data For a good twenty years following its formulation it was cited at face value without ever having been tested by historical comparative data Over the last decade Ljuba Veselinova has worked on testing the model in a comparative perspective and this edited volume further expands on her work The collection presented here features detailed studies of several language families such as Bantu Chadic and Indo European A number of articles focus on the micro variation and attested historical developments within smaller groups and clusters such as Arabic Mandarin and Cantonese and Nanaic Finally variation and historical developments in specific languages are discussed for Ancient Hebrew Ancient Egyptian Moksha Mordvin Uralic Bashkir Turkic Kalmyk Mongolic three Pama Nyungan languages O dam Southern Uto Aztecan and Tacana Takanan Amazonian Bolivia The book is concluded by two chapters devoted to modeling cyclical processes in language change from different theoretical perspectives Key notions discussed throughout the book include affirmative and negative existential constructions the expansion of the latter into verbal negation and subsequently from more specific to more general markers of negation Nominalizations as well as the uses of negative existentials as standalone negative answers figure among the most frequent pathways whereby negative existentials evolve as general negation markers The operation of the Negative Existential Cycle appears partly genealogically conditioned as the cycle is found to iterate regularly within some families but never starts in others as is the case in Bantu In addition other special negation markers such as nominal negators are found to undergo similar processes i e they expand into the verbal domain and thereby develop into more general negation markers The book

provides rich information on a specific path of the evolution of negation on cyclical processes in language change and it shows cases the historical comparative method in a modern setting

**Existential Constructions across Languages** Laure Sarda, Ludovica Lena, 2023-07-15 This volume reflects the centrality of the existential construction in current linguistic research and offers studies that both consolidate and challenge established research agendas It addresses i a variety of constructions related to prototypical existentials including the have possessive construction and investigates ii the relationships between locative existential and information structure iii the quantification of the pivot and iv the issue of negative existentials It brings together different and complementary approaches functional cognitive pragmatic typological comparative diachronic philosophical based on a wide variety of data sources The contributions illustrate how the so called existential construction can take a variety of forms more or less grammaticalized and functions ranging from the expression of literal existence to that of localization and discursive focus in a wide range of languages The book will be valuable for linguists researchers or students interested in the cross linguistic manifestations of existential constructions at the interface between syntax semantics and information structure

The Oxford Handbook of Word Classes Eva van Lier, 2023 This handbook explores multiple facets of the study of word classes also known as parts of speech or lexical categories The contributions showcase the importance of word classes for the whole discipline of linguistics while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research
