Environmental Concerns and Sustainable Development Sakarama Somayaji, Ganesh Somayaji, 2009-01-01 At the dawn of this 21st century environmental concerns have received utmost attention from all segments of human society The extreme abuse of nature and ruthless hunt for material happiness are the reasons for post enlightenment destruction of the environment Many consider the issues related to environmental degradation as an environmental crisis During the last century humans have been exploiting nature not merely for need but also for greed Environmentally concerned individuals call for immediate action to stop being greedy and act positively In India too this environmental awareness is fast spreading and the Honourable Supreme Court of India has directed the Central and state governments to introduce courses regarding environmental issues at all levels of education This book is a compilation of research results pertaining to development environment and

sustainable development in the form of articles

Operations Research and Environmental Management Carlo Carraro, Alain Haurie, 2012-12-06 The activities of the Fondazione ENI Enrico Mattei cover a broad spectrum of research topics ranging from economics to engineering from environmental management at the industry or regional level to basic mathematical modelling research It is the combination of the activities on these last two topics that led the Fondazione to organise with the University of Geneva a workshop where operations research tools were designed with the aim to provide national and local policy makers with appropriate analytical and policy instruments for environmental management In the recent past attention has often been devoted to global environmental issues in which the level of policy making is either international through multi country agreements on emission control or national when environmental policies are designed to control domestic pollution Many environmental problems however have a local or regional dimension Even when their dimension is global e g in the case of the greenhouse gas effect relevant decisions on emission control such as the adoption of energy saving utilities are taken at the local level In many countries the current legislation imposes the local authorities to prepare plans and adopt measures to control energy consumption or to reduce waste of natural resources It is therefore important to analyze the way in which local or regional authorities optimise their environmental management

China's West Region Development: Domestic Strategies And Global Implications Ding Lu, William A W Neilson, 2004-06-29 In the last two decades China's western inland region has largely been left out of the nation's economic boom While its 355 million population accounts for 28% and its land area for 71% of China's total the region's share of the national GDP is under 20% Since 1999 Beijing has implemented the West China Development Program to boost the region's growth To study the major domestic issues and the global implications of this program the University of Victoria's Centre for Asia Pacific Initiatives organized and hosted a multidisciplinary international conference on March 6-8 2003 This volume of papers presented at the conference offers perspectives on the issues by leading experts of diversified academic disciplines from China Canada the US and other countries

Energy and Society Alfredo Agustoni, Mara Maretti, 2015-10-08 This book deals with a pivotal issue often marginalized by sociological analysis the relationship between energy and society with different contributions from several European scholars The articles cover a series of topics concerning energy policies risk communication and sustainable development The increasingly complex social organization emerging from the energy shifts of the last two centuries incorporates an increasing quantity of expert knowledge Quite paradoxically when the expert systems seem to be realizing the dream of total control on the uncertainty of the events any occasional accident reveals to be a check for them contributes to undermining their credibility Following the idea of a post democratic turn this kind of mistrust can be considered a different face of political elites and politics in general

in the frame of a radical change concerning political culture in the last several decades This change is clear in areas such as risk communication governance and energy policies *China's West Region Development* Ding Lu, William A. Environmental Dispute Resolution Lawrence S. Bacow, Michael Wheeler, 2013-06-29 This book has its origins in an MIT research project that was funded by the U S Environmental Protection Agency EPA Our immediate objective was to prepare a set of case studies that examined bargaining and negotiation as they occurred between government environmental advocates and regulatees throughout the traditional regulatory process The project was part of a larger effort by the EPA to

make environmental regulation more efficient and less litigious The principal investigator for the research effort was Lawrence Susskind of the Department of Urban Studies and Planning Eight case studies were prepared under the joint supervision of Susskind and the authors of this book Studying the negotiating behavior of parties as we worked our way through an environmental dispute proved enlightening We observed missed opportunities for settlement negotiating tactics that backfired and strategies that appeared to be grounded more in intuition than in thoughtful analysis At the same time however we were struck by how often the parties ultimately managed to muddle through People negotiated not out of some idealistic commitment to consensus but because they thought it better served their own interests When some negotiations reached an impasse people improvised mediation These disputants succeeded in spite of legal and institutional barriers even though few of them had a sophisticated understanding of negotiation

Water Governance as Connective Capacity

Nanny Bressers, 2016-02-11 Water is becoming one of the world's most crucial concerns A third of the world's population has severe water shortage while three quarters of the global population lives in deltas which run the risk of severe flooding In addition many more face problems of poor water quality While it is apparent that drastic action should be taken in reality water problems are complex and not at all easy to resolve There are many stakeholders involved industries local municipalities farmers the recreational sector environmental organisations and others who all approach the problems and possible solutions differently This requires delicate ways of governing multi actor processes This book approaches the concept of water management from an interdisciplinary and non technical but governance orientation It departs from the fragmented nature of water management showing how these lack cooperation joint responsibility and integration and instead argues that the capacity to connect to other domains levels scales organizations and actors is of utmost importance Connective capacity revolves around connecting arrangements such as institutions actors for instance individuals and approaches such as instruments These three carriers of connectedness can be applied to different focal points the objects of fragmentation and integration in water management The book distinguishes five different focal points 1 government layers and levels 2 sectors and domains 3 time orientation of the long and the short term 4 perceptions and actor frames 5 public and private spheres Each contributor pays attention to a specific combination of one focal point and one connective carrier Bringing together case studies from countries including The Netherlands United Kingdom Romania Sweden Finland Italy India Canada and the United States the book focuses on the question of how to deal with the various sources of fragmentation in water governance by organizing meaningful connections and developing connective capacity In doing so it provides useful scientific and practical insights into how connective capacity in water governance can be enhanced
