The Journal of Experimental Zoology ,1929 A separate section of the journal Molecular and developmental evolution is devoted to experimental approaches to evolution and development **Bulletin** Eugenics Record Office,1917 **Gene Mapping in Laboratory Mammals Part B** Roy Robinson,2013-03-09 The present work is an attempt to provide a systematic treatment of genetic linkage in diploid heredity Part A presents a general account of statistical methods which can be brought to bear on the problem The primary emphasis is on the practical aspects of estimation A large proportion if not the majority of mutant genes fail to match up to textbook genes with faultless segregation ratios and expression yet these are the materials with which the practical researcher has to cope For this reason it is important to know how to deal with the

assortment of genes which may display significant deviations from expectation Part B examines the accumulated data on linkage for most of the laboratory mammals and provides a comprehensive and up to date survey The need for a critical review has often been expressed and it is hoped that the present analysis will fill the gap The volume of material is probably the most important in the animal kingdom other than that for *Drosophila* species **Rabbits** Laura Isabel Makepeace, 1956
