Dialogue With Bakhtin on Second and Foreign Language Learning Joan Kelly Hall, Gergana Vitanova, Ludmila A. Marchenkova, 2004-12-13 This volume is the first to explore links between the Russian linguist Mikhail Bakhtin s theoretical insights about language and practical concerns with second and foreign language learning and teaching Situated within a strong conceptual framework and drawing from a rich empirical base it reflects recent scholarship in applied linguistics that has begun to move away from formalist views of language as universal

autonomous linguistic systems and toward an understanding of language as dynamic collections of cultural resources. According to Bakhtin the study of language is concerned with the dialogue existing between linguistic elements and the uses to which they are put in response to the conditions of the moment. Such a view of language has significant implications for current understandings of second and foreign language learning. The contributors draw on some of Bakhtin's more significant concepts such as dialogue, utterance, heteroglossia, voice, and addressivity to examine real world contexts of language learning. The chapters address a range of contexts including elementary and university level English as a second language and foreign language classrooms and adult learning situations outside the formal classroom. The text is arranged in two parts. Part I, Contexts of Language Learning and Teaching, contains seven chapters that report on investigations into specific contexts of language learning and teaching. The chapters in Part II, Implications for Theory and Practice, present broader discussions on second and foreign language learning using Bakhtin's ideas as a springboard for thinking. This is a groundbreaking volume for scholars in applied linguistics, language education, and language studies with an interest in second and foreign language learning for teacher educators and for teachers of languages from elementary to university levels. It is highly relevant as a text for graduate level courses in applied linguistics and second and foreign language education. *The Routledge Handbook of Language and Dialogue* Edda Weigand, 2017-06-27. The Routledge Handbook of Language and Dialogue is the first comprehensive overview of the emerging and rapidly growing sub-discipline in linguistics, Language and Dialogue. Edited by one of the top scholars in the field, Edda Weigand, and comprising contributions written by a variety of likewise influential figures, the handbook aims to describe the history of modern linguistics as reasoned progress leading from de Saussure and the simplicity of artificial terms to the complexity of human action and behaviour which is based on the integration of human abilities such as speaking, thinking, perceiving, and having emotions. The book is divided into three sections: the first focuses on the history of modern linguistics and related disciplines; the second part focuses on the core issues and open debates in the field of Language and Dialogue and introduces the arguments pro and contra certain positions; and the third section focuses on the three components that fundamentally affect language use: human nature, institutions, and culture. This handbook is the ideal resource for those interested in the relationship between Language and Dialogue and will be of use to students and researchers in Linguistics and related fields such as Discourse Analysis, Cognitive Linguistics, and Communication. *Second Language Teacher Education* Karen E. Johnson, 2009-06-02. This book presents a comprehensive overview of the epistemological underpinnings of a sociocultural perspective on human learning and addresses in detail what this perspective has to offer the field of second language teacher education. **Identity and Language Learning** Bonny Norton, 2013-09-27. *Identity and Language Learning* draws on a longitudinal case study of immigrant women in Canada to develop new ideas about identity investment and imagined communities in the field of language learning and teaching. Bonny Norton demonstrates that a poststructuralist conception of identity as multiple, a site of struggle and subject to change across time.

and place is highly productive for understanding language learning Her sociological construct of investment is an important complement to psychological theories of motivation The implications for teaching and teacher education are profound Now including a new comprehensive Introduction as well as an Afterword by Claire Kramsch this second edition addresses the following central questions Under what conditions do language learners speak listen read and write How are relations of power implicated in the negotiation of identity How can teachers address the investments and imagined identities of learners The book integrates research theory and classroom practice and is essential reading for students teachers and researchers in the fields of language learning and teaching TESOL applied linguistics and literacy
