The Eclipse Project Tom Tucker,2000 *The P-38 Lightning and the Men Who Flew It* Wolfgang W. E.

Samuel,2025-04-15 The P 38 Lightning was one of the fastest operational fighters of World War II famous for its successes in North Africa and the Pacific In *The P 38 Lightning and the Men Who Flew It* Wolfgang W E Samuel shares the stories of the young men who climbed into the cockpits of the P 38 to fight for freedom and of those who created tested and deployed these fearsome machines The P 38 was the product of the Lockheed Corporation the first fighter they ever built principally conceptualized by Kelly Johnson whose design was to meet Air Corps specifications To do that he came up with a twin engine aircraft with a tricycle landing gear unlike any other military aircraft of the time But it was no easy plane to fly Many pilots died in training and routine flying before ever meeting an opponent in combat P 38 units were formed quickly once the United States entered World War II in December 1941 Training was rushed to get pilots and planes to Europe as quickly as possible to serve as bomber escorts Although the P 38 could fly at the high altitudes the bombers flew it was not the right aircraft for the mission Without an engine in front of the cockpit to keep the pilot warm the plane was frigid Pilots suffered and were sometimes so weakened by the brutal cold that they had to be lifted out of the cockpit upon landing and the bombers suffered severe losses In North Africa s warmer air however the P 38 came into its own With four 50 caliber machine guns and a 20mm cannon in its nose the P 38 was a formidable adversary With proven success in the Mediterranean P 38 squadrons were transferred to the Pacific Theater where they flourished Focusing on the men who flew this challenging aircraft and the men who designed and decided how to deploy it Samuel shares stories of bravery and ingenuity alongside an aviation history long neglected The P 38 s deployment is covered in some detail including the actions of Richard Bong who became the US forces ace of aces In the Pacific skies the P 38 its pilots and designers made the heroic history captured here

Silent Warriors, Incredible Courage Wolfgang W. E. Samuel,2019-02-19 The outbreak of the Korean War in June 1950 took the American military by surprise Rushing to respond the US and its allies developed a selective overflight program to gather intelligence Silent Warriors Incredible Courage is a history of the Cold War overflights of the Soviet Union its allies and the People s Republic of China based on extensive interviews with dozens of pilots who flew these dangerous missions In 1954 the number of flights expanded and the highly classified SENSINT program was born Soon American RB 45C RB 47E H RF 100s and various versions of the RB 57 were in the air on an almost constant basis providing the president and military leadership with hard facts about enemy capabilities and intentions Eventually the SENSINT program was replaced by the high flying U 2 spy plane The U 2 overflights removed the mysteries of Soviet military power These flights remained active

until 1960 when a U 2 was shot down by Russian missiles leading to the end of the program Shortly thereafter planes were replaced by spy satellites The overflights were so highly classified that no one planner or participant was allowed to talk about them and no one did until the overflight program and its pictorial record was declassified in the 1990s Through extensive research of existing literature on the overflights and interviews conducted by Wolfgang W E Samuel this book reveals the story of the entire overflight program through the eyes of the pilots and crew who flew the planes Samuel s account tells the stories of American heroes who risked their lives and sometimes lost them to protect their country

War Department, Howard Hughes Donald L. Barlett,James B. Steele,2011-04-11 The life that inspired the major motion picture The Aviator starring Leonardo DiCaprio and directed by Martin Scorsese Howard Hughes has always fascinated the public with his mixture of secrecy dashing lifestyle and reclusiveness This is the book that breaks through the image to get at the man Originally published under the title Empire The Life Legend and Madness of Howard Hughes American Aircraft Development Second World War Legacy William J. Norton,2021-12-02 This volume focuses on the influence of America s Second World War aviation development and experience subsequent aviation technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war Korea The period was one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress These systems were of immense importance influencing and growing the engineering production and operational capabilities to be exploited for the next generation of weapons that soon followed Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation influencing the evolution of follow on models or types Included are military prototype experimental and research aircraft that are equally important in understanding the history of American aircraft development Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow **Flying Magazine** ,1940-02 Flying Magazine ,1941-01 **Mentor Inbound** Sheryl L. Hutchison,2009-09-03 The Rockford Register Republic newspaper carried the headline in January 1945 Aboard a Flying Fortress which appeared a flaming torch spewing gasoline from its load of 15 000 gallons and trailing fire like a comet a bomber crew which included LtCol Fred J Ascani Rockford pilot continued its run over a Ploesti oil field target and came

through safely This was only one of 53 WWII missions flown by the talented aviator and reported by American newspapers Truth be told Ascani's contributions to the development of airpower would be covered extensively by the media right up until he retired from the United States Air Force in 1973 History would remember MGen Ascani not only as the 1951 World Speed Record Holder but also as a tough and demanding task master who recognized the dangers of emerging aviation technology He was a devoted flyer who wanted to experience the thrill of every new engine and airframe designed to free man from the bonds of earth He would contribute to the Golden Age of Flight Test develop the process by which the fledgling USAF would turn experiments into combat system and then go on to direct the XB 70 program technology later used to build the world's first reusable space craft the space shuttle By the time he retired from the USAF in 1973 he had logged some 6288 hours of flying time in an incredibly unique variety of aircraft Mentor Inbound is his story as told to and recorded by Sheryl Hutchison

American Aircraft Development of the Second World War William Norton, 2019-07-06 This book presents a little known aspect of America's aircraft development of World War II in emphasizing unique and non production aircraft or modifications for the purpose of research and experimentation in support of aircraft development advancing technology or meeting narrow combat needs It describes some important areas of American aviation weapons maturation under the pressure of war with emphasis on advanced technology and experimental aircraft configurations The great value of the work is illumination of little known or minimally documented projects that significantly advanced the science of aeronautics propulsion aircraft systems and ordnance but did not go into production Each chapter introduces another topic by examining the state of the art at the beginning of the war advantages pursued and results achieved during the conflict This last is the vehicle to examine the secret modifications or experiments that are little known Consequently this is an important single source for a fascinating and diverse collection of wartime efforts never before brought together under a single cover The war stories are those of military staffs engineering teams and test pilots struggling against short schedules and tight resource constraints to push the bounds of technology These epic and sometimes life threatening endeavors were as vital as actual combat operations *The New York Times Index* ,1925 Women in Space - Following Valentina Shayler David, Ian A. Moule, 2006-08-29 Space

exploration has developed from early unmanned space probes through the pioneering years of the Manned Mercury Gemini and Apollo missions to missions that now include women in the crew as a matter of course Dave Shayler tells the story of the first woman balloonist in 1784 to their breakthrough as astronauts and cosmonauts in a range of professional roles He covers the contribution women have made to space exploration and draws on interviews with Shuttle and Mir crew members who were women These interviews detail the achievements of the first female Shuttle commander and the first female resident crew member of the International Space Station These and many other events are presented in a detailed and highly readable account that recalls the difficult path to space exploration by women **Bibliography of Scientific and Industrial Reports** ,1947 **A WASP Among Eagles** Ann Carl, 1999 The memoir of a woman test pilot in World War II The

author belonged to a corps of women pilots on the home front who for the most part delivered planes and tested repaired ones In her case however she experimentally tested the B 29 Superfortress and the Bell YP 59A jet fighter After the war she became a journalist and sailor sailing all the way to Turkey
