The need for evidence-based practice in mental health services is becoming clearer by the day, and until recently the trend of emphasizing services with supporting empirical evidence has been almost exclusively limited to a focus on treatment options. *A Guide to Assessments That Work* fills a void in the professional literature by addressing the critical role that assessment plays in providing evidence-based mental health services. To optimize its usefulness to readers, this volume addresses the assessment of the most commonly encountered disorders or conditions among children, adolescents, adults, older adults, and couples. Strategies and instruments for assessing mood disorders, anxiety disorders, couple distress, and sexual problems, health-related problems, and many other conditions are also covered in depth.
