Test-tube Conception Erminio Peter Volpe,1987 A look at modern developments in medical technology covers in vitro fertilization frozen embryos surrogate mothers sex selection clones genetic engineering and moral issues *A Sexual Odyssey* Kenneth E. Maxwell,2013-11-11 The Brave New World of Sex We've seen in less than a generation a swift revolution in human sexual behavior attitude and consequences so dramatic that some people are left in a state of stunned dismay and the public at large in aimless confusion Much of the trend if you can call a revolution a trend is fueled by or at least made possible by technological innovations dating back to the middle of the twentieth century The birth control pill opened the gate to promiscuity with little fear of pregnancy marriage became an annoyance divorce became an opportunity two working parents became a necessity and teenage sex became nearly as socially acceptable as holding hands or going to the movies The copulation explosion resulted in a spiraling epidemic of children giving birth to children many of them on welfare Girls seeking relief through abortions were sometimes forced to have their unwanted offspring despite the inevitability of some of them living in poverty and a desperate dead end environment of squalor and crime Some misguidedly wanted babies and ended up the same way To top it all discipline 2 *A Sexual Odyssey* became a lost art leaving schools and neighborhoods infested with gun toting knife wielding teenage delinquents even in middle class areas who engaged in contests to see who could get the most girls knocked up The chaotic state of fornication mating and birthing may be a throwback to the past

*Technologies of the Gendered Body* Anne Marie Balsamo,1996 This book looks at the representation of the body in culture from a feminist perspective Subjects covered include bodybuilding cosmetic surgery and cyberculture Revisioning Women, Health and Healing Adele E. **Love at Goon Park** Deborah Blum,2011-07-05 In this meticulously researched and masterfully written book Pulitzer Prize winner Deborah Blum examines the history of love through the lens of its strangest unsung hero a brilliant fearless alcoholic psychologist named Harry Frederick Harlow Pursuing the idea that human affection could be understood studied even measured Harlow 1905 1981 arrived at his conclusions by conducting research sometimes beautiful sometimes horrible on the primates in his University of Wisconsin laboratory Paradoxically his darkest experiments may have the brightest legacy for by studying neglect and its life altering consequences Harlow confirmed love s central role in shaping not only how we feel but also how we think His work sparked a psychological revolution The more children experience affection he discovered the more curious they become about the world Love makes people smarter The biography of both a man and an idea The Measure of Love is a powerful and at times disturbing narrative that will forever alter our understanding of human relationships

*Technology and Christianity* Egbert Schuurman,2024-08-27 The Enlightenment of

the 18th century ushered in a new order of the ages one in which man displaced God as the central focus of both thought and practice This has had consequences For one thing man has taken up the supposedly vacated role of Providence How has he done it Not least by gaining an increasing mastery over nature a mastery enabled by technology The tools provided by technology have undeniably brought great blessing but they have also brought new and unprecedented problems Such powerful tools have given mankind opportunities for good but also for evil and he has taken advantage of both In this series of articles written and published over a period of 50 years Egbert Schuurman elucidates this complex and difficult relationship Technology has generated a material culture capable of providing undreamed of wealth and welfare but likewise has brought labor displacement environmental damage weaponry of devastating destructive capacity and possibilities of societal control only dreamed of by history s tyrants Schuurman expands on all of these consequences and he does so from a unique perspective that of the once dominant but since displaced perspective of Christianity In doing so he demonstrates not only that there are opportunities as well as difficulties involved in the ever expanding dominance of technology but also that Christianity can provide the framework for properly assessing and implementing the responsible application of technology But for this to happen the sorcerer s apprentice needs to recognize his utter dependence on his Creator and Redeemer

**Biotechnology and Culture** Paul E.

Brodwin,2001-01-22 Essays on technology s effect on our relationship with our bodies A timely and perceptive look at some of the most anxiety producing issues of the day Paul Rabinow University of California Berkeley As birth illness and death increasingly come under technological control struggles arise over who should control the body and define its limits and capacities Biotechnologies turn the traditional facts of life into matters of expert judgment and partisan debate They blur the boundary separating people from machines male from female and nature from culture In these diverse ways they destroy the

gold standard of the body formerly taken for granted Biotechnologies become a convenient tangible focus for political contests over the nuclear family legal and professional authority and relations between the sexes Medical interventions also transform intimate personal experience giving birth building new families and surviving serious illness now immerse us in a web of machines expert authority and electronic images We use and imagine the body in radically different ways and from these emerge new collective discourses of morality and personal identity This book brings together historians anthropologists cultural critics and feminists to examine the broad cultural effects of technologies such as surrogacy tissue culture research and medical imaging The moral anxieties raised by biotechnologies and their circulation across class and national boundaries provide other interdisciplinary themes for discourse in these essays The authors favor complex social dramas of the refusal celebration or ambivalent acceptance of new medical procedures Eschewing polemics or pure theory contributors show how biotechnology collides with everyday life and reshapes the political and personal meanings of the body Contributors include Paul Brodwin Lisa Cartwright Thomas Csordas Gillian Goslinga Roy Deborah Grayson Donald Joralemon Hannah Landecker Thomas Laqueur Robert Nelson Susan Squier Janelle Taylor and Alice Wexler This impressive collection offers a number of rich examples of why the development of anthropological studies of science technology and their disruptive social effects is a leading edge of critical enquiry Arthur Kleinman Harvard University

**Good and Evil** Raimond Gaita, 2004 Raimond Gaita's *Good and Evil* is one of the most important original and provocative books on the nature of morality to have been published in recent years It is essential reading for anyone interested in what it means to talk about good and evil Gaita argues that questions about morality are inseparable from the preciousness of each human being an issue we can only address if we place the idea of remorse at the centre of moral life Drawing on an astonishing range of thinkers and writers including Plato Wittgenstein George Orwell and Primo Levi Gaita also reflects on the place of reason and truth in morality and ultimately how questions about good and evil are connected to the meaning of our lives This revised edition of *Good and Evil* includes a substantial new preface and afterword by the author

**Tissue Culture in Science and Society** D. Wilson, 2011-07-28 This book charts the social and cultural history of the scientific technique known as tissue culture It shows how tissue culture was a regular public presence in twentieth century Britain and argues that history can contribute to current debates surrounding research on human and animal tissue

*Dawning of the Matriarch Society* Alan Paine, 2018-06-28 This is *Dawning of the Matriarch Society* The Extinction Riddle Solution All the great nations face a fertility crisis An enlightened poet comes to tell them why and that the news gets worse delivering a bitter cure to a utopian future Infertility stalks America and indeed the world as it has done to all vanquished cultures Science and the reproduction experts have hoodwinked American women into believing that making babies is as easy as growing fungus in a petri dish Let us call it making babies without benefit of love By default the event places no importance on the act of sexual love It is the zenith of cultural misplaced adulation and amoral desperation as reflected in government for these many years

Author Alan Paine claims guidance from the divine feminine in bringing an answer to what is a riddle perhaps hundreds of thousands of years old Why can we no longer reproduce Such is the riddle of humanity and it is at long last answered here Predicted by the current Dalai Lama and even Nostradamus Dawning of the Matriarch Society is prophecy come to life It is born of timeless tears and forged in mystical fires of cosmic creation Where spirituality meets reason waits the last renaissance
