A History of the Bible John Barton, 2019 In Western culture the Bible is monolithic John Barton argues that the Bible is not a prescription to a complete fixed religious system but rather a product of a long and intriguing process which has inspired Judaism and Christianity but still does not describe the whole of either religion He further argues that a thorough understanding of the history and context of its writing encourages religious communities to move away from the Bible's literal wording which is impossible to determine and focus instead on the broader meanings of scripture
