

Testing Quantum Mechanics on New Ground

Pavlos Melnick

Quantum mechanics is the most successful theory in physics, but it is also the most mysterious. It describes the behavior of particles at the smallest scales, but it is not clear how it fits into a larger picture of the universe. One of the most intriguing questions in quantum mechanics is whether it is a fundamental theory or just an approximation of a deeper reality. This talk will explore the latest experiments that are testing the foundations of quantum mechanics, and what they might tell us about the nature of reality.
