Subcommittee on Space and Aeronautics, 2002 *Selectivity And Discord* Allan Franklin, 2002-11-17 Selectivity and Discord addresses the fundamental question of whether there are grounds for belief in experimental results Specifically Allan Franklin is concerned with two problems in the use of experimental results in science selectivity of data or analysis procedures and the resolution of discordant results By means of detailed case studies of episodes from the history of modern physics Franklin shows how these problems can be and are solved in the normal practice of science and therefore that experimental results may be legitimately used as a basis for scientific knowledge **Beyond Einstein** David E.
