To See Every Bird on Earth Dan Koeppel,2006-04-25 What drives a man to travel to sixty countries and spend a fortune to count birds And what if that man is your father Richard Koeppel s obsession began at age twelve in Queens New York when he first spotted a Brown Thrasher and jotted the sighting in a notebook Several decades one failed marriage and two sons later he set out to see every bird on earth becoming a member of a subculture of competitive bird watchers worldwide all pursuing the same goal Over twenty five years he collected over seven thousand species becoming one of about ten people ever to do so To See Every Bird on Earth explores the thrill of this chase a crusade at the expense of all else for the sake of making a check in a notebook A riveting glimpse into a fascinating subculture the book traces the love loss and reconnection between a father and son and explains why birds are so critical to the human search for our place in the world Marvelous I loved just about everything about this book Simon Winchester author of The Professor and the Madman A lovingly told story helps you understand what moves humans to seek escape in seemingly strange other worlds Stefan Fatsis author of Word Freak Everyone has his or her addiction and birdwatching is the drug of

choice for the father of author Dan Koeppel who writes affectionately but honestly about his father's obsession Audubon Magazine editor's choice As a glimpse into human behavior and family relationships To See Every Bird on Earth is a rarity a book about birding that nonbirders will find just as rewarding Chicago Tribune **Birdlife of Houston, Galveston, and the Upper Texas Coast** Ted Eubanks, Robert A. Behrstock, Ron J. Weeks, 2006 In the last thirty years the Upper Texas Coast has become a must go destination for birders around the globe This book will serve as an essential companion to the customary field guide and pair of binoculars for all visitors to Houston High Island Galveston Freeport or any of the area's other exciting birding spots It also places the birdlife of the region a seven county area with a larger bird list than forty three states into historical and ecological contexts Authors Eubanks Behrstock and Weeks all recognized authorities on the migrant and resident birds of this region present a thorough introduction to the area's history physiography and avifauna Then in generous discussions of bird families and species they synthesize years of records tracking the comings and goings of more than 480 birds and incorporating their own lifetimes of experience to create an ornithological mosaic of lasting significance

Birds in Trouble Lynn E. Barber, 2016-04-15 As oil was washing up on the shores of Louisiana covering shorebirds and their nests and eggs after the Deepwater Horizon disaster Lynn Barber decided to write this book to heighten awareness not only of the plight of bird species that are declining in numbers every year but also of the ways in which the birds we see every day may also face the same fate First explaining the idea of birds in trouble and what that means in terms of population conservation status and national and international designations the book then turns to the habitats that are important to birds how they are affected by changes in these habitats and what ordinary people can do to help counter those negative effects Barber then profiles forty two species that are in trouble in the United States discussing the likely reasons why and what if anything we can do to improve their situations Illustrated throughout with the author's signature bird art the book closes with a reminder about what we can do to ensure that the birds we see every day in our yards parks and communities will remain with us

Big Years, Biggest States Lynn E. Barber, 2020-04-30 Undertaking a Big Year requires a more extreme version of planning than what is needed to bird in a typical year In a Big Year a birder is trying to see or hear new birds every day day after day throughout the whole year The first woman to complete a North American Big Year continental United States and Canada and identify over 700 species Lynn E Barber clocked more than 175 000 miles and ticked off a then record setting 723 species over twelve months in 2008 Yet even as an anomaly a female birder in the then male dominated world of competitive birding she took the initiative to reimagine the whole idea of a Big Year in the two biggest states in the country At home in both Texas and Alaska Barber offers an inside look into how to plan execute and thoroughly enjoy a year of finding the birds that inhabit two of the nation's most diverse landscapes The drastic differences between the climate geography plant life and habitat at the far northern and southern edges of the US mainland mean seeing a distinct number of birds in each state that are not found in the other Yet as states with both coastal and international boundaries

Texas and Alaska provide countless opportunities to see the most seasonally varied far flying and specifically adapted birds in the world As Barber chronicles her travels throughout the Texan and Alaskan landscapes serious and casual birders alike will appreciate her lively and informative prose and commitment to her distinct approach to the Big Year challenge **Game Breeder and Sportsman** ,1929 *Life Histories of North American Birds* Bendire,1892 The Life History of a Texas Birdwatcher Karen Harden McCracken,2001 In any other context saying that someone was for the birds would hardly be polite But applied to Connie Hagar it would be high praise The diminutive birdwatcher nicknamed Connie was reared as Martha Conger Neblett in early twentieth century Texas where she led a genteel life of tea parties and music lessons But at middle age she became fascinated with birds and resolved to learn everything she could about them In 1935 she and her husband Jack moved to Rockport on the Coastal Bend of Texas to be at the center of one of the most abundant areas of bird life in the country Her diligence in observation soon had her setting elite East Coast ornithologists on their ears as she sighted more and more species the experts claimed she could not possibly have seen Repeatedly she proved them wrong She ultimately earned the respect and love of birders from the shores of New Jersey to the islands of the Pacific Life Magazine pictured her in a tribute to the country s premier amateur naturalists and she received many awards from nature and birding societies Connie Hagar s life history is more than just a bird book Hers is a story of dedication to nature and the role she could play in promoting it to others despite recurring threats of blindness and other health problems The hundreds of species of birds that visited Rockport each year brought thousands of other birders and Connie patiently hosted and assisted both the greenest beginners and the most magisterial experts It was she more than any other person who made coastal Texas and especially Rockport a mecca for all serious birders Karen Harden McCracken and Connie Hagar s Boswellian Johnsonian relationship in the 1960s Connie s own Nature Calendars containing thirty five years of observations and interviews with those who knew the birdwoman of Rockport provide the basis for this simple but exhilarating narrative A Texan Plan for the Texas Coast James B. Blackburn,2017-10-13 In this powerful call to action conservationist and environmental lawyer Jim Blackburn offers an unconventional yet feasible plan to protect the Texas coast The coast is in danger of being damaged beyond repair due to the gradual starvation of freshwater inflows to its bays the fragmentation of large tracts of land and general public neglect Most importantly it is threatened by our denial that the coast faces major threats and that its long term health provides significant economic benefits To save coastal resources a successful plan needs to address the realities of our current world The challenge is to sustain an economy that creates optimism and entrepreneurship while considering finite natural resources In other words a successful plan to save the Texas coast needs to be about making money Whether visiting with farmers and ranchers or oil and chemical producers Blackburn recognizes that when talking about the natural environment in monetary terms people listen Many of the services we get from the coast are beginning to be studied for their dollar values a trend that might offer Texas farms and ranches the potential for cash flow which may in turn alter

conservation practices throughout Texas and the United States Money alone cannot be the only motivation for caring about the Texas coast though Blackburn encourages Texans to get to know this landscape better Beautifully illustrated and accessibly written A Texan Plan for the Texas Coast weaves together a challenging but promising plan to protect the coast through economic motivation thoughtful litigation informed appreciation and simple affection for the beauty and life found on the Texas coast
