Gabbard, Bonnie E. Litowitz, Paul Williams, 2012-09-24 The second edition of this groundbreaking text represents a complete departure from the structure and format of its predecessor Though still exhaustive in scope and designed to provide a knowledge base for a broad audience from the beginning student to the seasoned analyst or academician this revision emphasizes the interdisciplinary nature of psychoanalytic thought and boldly focuses on current American psychoanalysis in all its conceptual and clinical diversity This approach reflects the perspective of the two new co editors whose backgrounds in linguistics and social anthropology inform and enrich their clinical practice and the six new section editors who themselves reflect the diversity of backgrounds and thinking in contemporary American psychoanalysis The book begins with Freud and his circle and the origins of psychoanalysis and goes on to explore its development in the post Freud era This general introduction orients the reader and helps to contextualize the six sections that follow The most important tenets of psychoanalysis are defined and described in the Core Concepts section including theories of motivation unconscious processes transference and countertransference defense and resistance and gender and sexuality These eight chapters constitute an excellent introduction to the field of psychoanalysis The Schools of Thought section features chapters on the most influential theories from object relations to self psychology to attachment theory and relational psychoanalysis and includes the contributions of Klein and Bion and of Lacan Rather than making developmental theory a separate section as in the last edition developmental themes now permeate the Schools of Thought section and illuminate other theories and topics throughout the edition Taking a more clinical turn the Treatment and Technique section addresses critical subjects such as transference and countertransference theories of

therapeutic action process interpretation and resistance termination and reanalysis combined psychoanalysis and psychopharmacotherapy child analysis ethics and the relationship between psychoanalysis and psychodynamic psychotherapy A substantive utterly current and meticulously referenced section on Research provides an in depth discussion of outcome process and developmental research The section entitled Psychoanalysis and Other Disciplines takes the reader on a fascinating tour through the many fields that psychoanalysis has enriched and been enriched by including the neurosciences philosophy anthropology race ethnicity literature visual arts film and music A comprehensive Glossary completes this indispensable text The Textbook of Psychoanalysis is the only comprehensive textbook of psychoanalysis available in the United States This masterful revision will both instruct and engage those who are learning psychoanalysis those who practice it and those who apply its theories to related disciplines Though always controversial this model of the human psyche still provides the best and most comprehensive insight into human nature Textbook in Analytic Group Psychotherapy Samuel Richard Slavson, 1964 Transactional Analysis Psychotherapy Petruska Clarkson, 2013-04-15 Transactional Analysis Psychotherapy An Integrated Approach is the first advanced clinical textbook for many years written for psychotherapists and counsellors who use the theory and techniques of Transactional Analysis in their practice or who are interested in expanding their repertoire Clarkson provides a comprehensive guide to goal setting and clinical planning for every stage of treatment Not only a practical textbook relevant to modern developments in supervision but one which makes a new and original contribution to ways of thinking about transference and countertransference the theory of self and Psychotherapy of Preoedipal Conditions Hyman Spotnitz, 1995-08-01 To find the process of psychotherapeutic change more information on Rowman Littlefield titles please visit us at www rowmanlittlefield com The Practice of Functional Analytic Psychotherapy Jonathan W.
