seminal in the field and indispensable in the clinician's library Oxford Textbook of Medicine D. A. Warrell, Timothy M. Cox, John D. Firth, 2005 *Global HIV/AIDS Medicine* Paul Volberding, 2008 HIV/AIDS management poses many different challenges around the world and the therapies available in the West are often not economically feasible in developing countries. This new book is the first to address the myriad of clinical difficulties faced by health practitioners worldwide in managing HIV/AIDS. Edited by the same authorities responsible for the highly respected reference *The Medical Management of AIDS* with Associate Editors that include the President of the International AIDS Society and a preeminent opinion leader in the fight against AIDS in Africa and authored by a who's who of current global experts on HIV and AIDS medicine, this visionary text presents all the practical indispensable information that clinicians everywhere need to offer their patients the best possible care. Access reliable up to the minute guidance that addresses the realities of HIV/AIDS management in your geographical region thanks to contributions from a global cast of renowned expert clinicians and researchers. Locate the clinically actionable information you need quickly with an organization that mirrors the current state of the AIDS epidemic and the different needs of Western vs. developing world patients and clinicians. Diagnose AIDS manifestations confidently by comparing them to full color clinical images. Review essential data quickly through numerous at a glance tables. *Textbook of Blood Banking and Transfusion Medicine* Sally V. Rudmann, 2005-02-18 This comprehensive book on transfusion practices and immunohematology offers concise thorough guidelines on the best ways to screen donors, store blood components, ensure safety, anticipate the potentially adverse effects of blood transfusion and more. It begins with the basics of genetics and immunology and then progresses to the technical aspects of blood banking and transfusion. Chapters are divided into sections on Basic Science, Review, Blood Group Serology, Donation, Preparation and Storage, Pretransfusion Testing, Transfusion Therapy, Clinical Considerations, and Safety, Quality Assurance, and Data Management. Developed specifically for medical technologists, blood bank specialists, and residents, the new edition conforms to the most current standards of the American Association of Blood Banks (AABB). Expert Opinion essays written by well-known frequently published experts discuss interesting topics of research or new advances in the field. Important terms are defined in the margins of the pages on which they appear, enabling readers to easily check the meaning of an unfamiliar term where it appears in context. Margin notes highlight important concepts and points, remind readers of previously discussed topics, offer an alternative perspective, or refer readers to other sources for further information. Material conforms to the most recent AABB standards for the most accurate up to date information on immunohematology. Advanced concepts beyond what is required for entry level practice are set apart from the rest of the text so readers can easily differentiate between basic and advanced information. A new chapter on Hematopoietic Stem Cells and Cellular Therapy, chapter 19, provides cutting edge coverage of cellular therapy and its relevance to blood banking. New content has been added on molecular genetics, component therapy, and International Society of Blood Transfusion (ISBT) nomenclature as well as the latest information on HIV, hepatitis, quality assurance, and
