The Environment A Human Crisis

Michal Rosen-Zvi

The Environment A Human Crisis:

The Environment: a Human Crisis Michael D. Piburn, 1974 Examines various environmental problems caused by population pollution misuse of natural resources and their possible solutions **Human Rights and the Environment**

Lyuba Zarsky, 2012 The impact of environmental damage on human rights civil political or welfare and labour rights is becoming ever more widely appreciated and has direct bearing on the behaviour of companies and their norms of conduct In this volume contributors draw on the tools and insights of a range of disciplines including law anthropology economics geography and social science to analyze the issues and show how new standards that protect rights and liberties can be established **The Oxford Handbook of Comparative Environmental Law** Emma Lees, Jorge E. Viñuales, 2019-05-06

This Handbook is the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points country studies from all continents responses to common problems including air pollution water management nature conservation genetically modified organisms climate change and energy chemicals waste foundational components of environmental law systems including principles property rights administrative and judicial organisation command and control regulation market mechanisms informational techniques and liability mechanisms and common interactions of environmental protection with the broader public private and criminal law contexts The volume brings together the foremost authorities in this field from around the world to provide a concise self contained and technically rigorous account of environmental law as a single overall system **The Environment in Anthropology, Second Edition** Nora Haenn, Allison Harnish, Richard

Wilk, 2016-04-26 Presents ecology and current environmental studies from an anthropological point of view The Environment in Anthropology presents ecology and current environmental studies from an anthropological point of view From the classics to the most current scholarship this text connects the theory and practice in environment and anthropology providing readers with a strong intellectual foundation as well as offering practical tools for solving environmental problems Haenn Wilk and Harnish pose the most urgent questions of environmental protection How are environmental problems mediated by cultural values What are the environmental effects of urbanization When do environmentalists goals and actions conflict with those of indigenous peoples How can we assess the impact of environmentally correct businesses They also cover the fundamental topics of population growth large scale development biodiversity conservation sustainable environmental management indigenous groups consumption and globalization This revised edition addresses new topics such as water toxic waste neoliberalism environmental history environmental activism and REDD Reducing Emissions from Deforestation and Forest Degradation and it situates anthropology in the multi disciplinary field of environmental research It also offers readers a guide for developing their own plan for environmental action This volume offers an introduction to the breadth of ecological and environmental anthropology as well as to its historical trends and current developments Balancing landmark essays with

cutting edge scholarship bridging theory and practice and offering suggestions for further reading and new directions for research The Environment in Anthropology continues to provide the ideal introduction to a burgeoning field

Assessing Vulnerability to Global Environmental Change Anthony Patt,Dagmar Schröter,Klein Richard J. T.,Anne Cristina de la Vega-Leinert,Rik Leemans,2012-05-16 Assessing the vulnerability of human populations to global environmental change particularly climate change is now the main imperative of research and international action However much of the research into vulnerability is not designed to feed directly into decision making and policy creating a gap between the knowledge created by researchers and what is required by decision makers This book seeks to rectify this problem and bridge the gap It discusses vulnerability as the central theme and brings together many different applications from disaster studies climate change impact studies and several other fields and provides the most comprehensive synthesis of definitions theories formalization and applications to date illustrated with examples from different disciplines regions and periods and from local through to regional national and international levels Case study topics cover sea level rise vulnerability to changes in ecosystem services assessing the vulnerability of human health and double exposure to climate change and trade liberalization amongst other issues Research outcomes stress that science policy dialogues must be transparent to be effective and concentrate on a mutual understanding of the concepts used A key research finding is that the most useful information for decision makers is that which shows the separate causes and drivers of vulnerability rather than presenting vulnerability in an aggregated form The book concludes with a unifying framework for analysing integrated methodologies of vulnerability assessment and guiding how research and policy can be linked to reduce vulnerability

Human Behavior and the Social Environment, Macro Level Katherine van Wormer,Fred H. Besthorn,2010-10-11 A timely revision in this global age Human Behavior and the Social Environment Macro Level develops a sophisticated and original view of the cultural global spiritual and natural worlds that people inhabit and the impact of these worlds on human behavior Its major new theme sustainability emerges as a key characteristic of contemporary practice What is sustainable social work What are the characteristics of a sustainable community How is the present exploitation of environmental resources unsustainable for future generations Following the greatest economic upheaval since the Great Depression how can we envision a sustainable economy that will benefit all the people not only the wealthy few Human behavior results from biological psychological socio economic and cultural forces but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio economic and cultural considerations This significant collaboration seeks to correct this omission by helping students recognize patterns in the family culture and value systems in order to create safe and sustainable environments for their future clients The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice Integrates up to date research findings models and government statistics Enhanced discussions of theory group dynamics family community and the environment Theoretical concepts and

practice implications in each chapter Highlights the importance of the natural environment and ecology the community of the earth to human and group behavior Sets forth a refined understanding of the role of spirituality the community of faith in people s lives Focuses on evidence based theory and research Teaches from a global cross cultural perspective highlighting themes of empowerment and social justice Features dynamic readings personal narratives and photographs that highlight each chapter s topic Accompanied by an online instructor s manual with lecture presentations chapter summaries key terms suggested classroom activities and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE Don t miss the companion volume Human Behavior and the Social Environment Micro Level Second Edition which offers an eye opening view of how biological psychological and cultural forces influence individuals behavior **Minority and Indigenous**

Trends 2023 - Focus on water Nicolas Salazar Sutil,Carl Söderbergh,2023-06-20 The past year saw some of the worst cyclones recorded in the Pacific some of the costliest and worst ever recorded floods in Australia Pakistan and across the African continent coupled with major droughts affecting parts of Central East and Southern Africa the Americas Central Asia Europe and the Middle East prompting many experts to declare that the planet s water cycle has been severely disrupted due to human activity For members of minorities indigenous peoples and other marginalized groups the water crisis is often an existential threat affecting numerous rights such as to life health self governance sanitation and culture Water justice cannot be attained unless the communities that protect water systems from the threats of extractivism overuse and pollution are prioritized in the international arena Community led solutions drawing on traditional knowledge systems are the key to solving the water crisis This year s Minority and Indigenous Trends report brings together three thematic chapters and over thirty case studies written by members of communities on the frontline of the water crisis as well as leading water activists researchers and policymakers These first hand accounts cover a range of issues from conflict in water stressed parts of the world to cultural forms of water conservancy and peaceful governance The ways in which water issues affect the lives of minority and indigenous women children and people with disabilities to mention a few intersectional aspects of the water crisis are highlighted in this volume Resolving the difficulties they face is an inextricable aspect of planetary water justice

Humanitarian Crises and Migration Susan Martin,Sanjula Weerasinghe,Abbie Taylor,2014-04-24 Whether it is the stranding of tens of thousands of migrant workers at the Libyan Tunisian border or the large scale displacement triggered by floods in Pakistan and Colombia hardly a week goes by in which humanitarian crises have not precipitated human movement While some people move internally others internationally some temporarily and others permanently there are also those who become trapped in place unable to move to greater safety Responses to these crisis migrations are varied and inadequate Only a fraction of crisis migrants are protected by existing international regional or national law Even where law exists practice does not necessarily guarantee safety and security for those who are forced to move or remain trapped Improvements are desperately needed to ensure more consistent and effective responses This timely book brings together

leading experts from multi disciplinary backgrounds to reflect on diverse humanitarian crises and to shed light on a series of exploratory questions In what ways do people move in the face of crisis situations Why do some people move while others do not Where do people move When do people move and for how long What are the challenges and opportunities in providing protection to crisis migrants How might we formulate appropriate responses and sustainable solutions and upon what factors should these depend This volume is divided into four parts with an introductory section outlining the parameters of crisis migration conceptualizing the term and evaluating its utility This section also explores the legal policy and institutional architecture upon which current responses are based Part II presents a diverse set of case studies from the earthquake in Haiti and the widespread violence in Mexico to the ongoing exodus from Somalia and environmental degradation in Alaska and the Carteret Islands among others Part III focuses on populations that may be at particular risk including non citizens migrants at sea those displaced to urban areas and trapped populations The concluding section maps the global governance of crisis migration and highlights gaps in current provisions for crisis related movement across multiple levels This valuable book brings together previously diffuse research and policy issues under the analytical umbrella of crisis migration It lays the foundations for assessing and addressing real challenges to the status quo and will be of interest to scholars policy makers and practitioners committed to seeking out improved responses and ensuring the dignity and safety of millions who move in the context of humanitarian crises

Heidegger in the Face of the Environmental Question Enrique Leff, 2023-12-22 This volume engages with the work of Heidegger to argue that the modern environmental crisis is fundamentally a crisis of understanding Life resulting from the symbolic codification of the world from the Logos of Greek philosophy to the rationality of the modern world and resulting in a metaphysics that privileges ontological thinking on the question of being over the environmental question and the concern for the conditions of life Exploring the work of the three principal thinkers of the Lebensphilosophie Bergson Dilthey and Husserl it charts the itinerary of Heidegger s work and exposes its conflicts with the work of Marx Plessner Haar and Derrida A critical argument against the colonization of the world by Eurocentric reason and for the deconstruction of Capital Heidegger in the Face of the Environmental Question draws on Latin American environmental thought to re think the conditions for life on Earth It will therefore appeal to scholars of philosophy political theory and political sociology with interests in environmental philosophy political ecology and socioeconomic transformation

The Politics of Climate Change Paul G. Harris, 2013-09-13 Climate change is now a mainstream part of the international political agenda It has become clear that it is not solely a technical issue to be resolved by scientists but a political issue with political implications at all levels of global governance Indeed some may argue that few long term problems in international affairs are more important than this one The purpose of this book is to reveal and apply some of the latest thinking on the implications of climate change for international affairs and to explore how various proposals for tackling climate change will affect interstate relations in coming years Chapters by scholars of international relations

international political economy and international law contribute to current discussions of climate change doing so in way that is accessible to students stakeholders government officials and informed laypersons Some questions considered in the book include the following How has the discussion of climate change affected interstate relations How does this problem and how do environmental issues more generally challenge international relations theory How do international climate politics influence domestic politics and vice versa How would climate change or action taken to tackle it affect the balance of power or balance of influence Is climate change a matter of international security or international justice or both and how does the answer to this question affect policy responses of governments Which states are likely to benefit or suffer from the various proposals to address climate change What are the legal ethical and political implications of the uneven distribution of the impacts of climate change This book was previously published as a special issue of the Cambridge Review of International Affairs
