

ENVIRONMENT

Environment refers to the surroundings or conditions in which a person, animal, or plant lives or operates.

Everything on Earth is part of the environment: living things and non-living things.

The main functions of the environment are: provides the supply of resources, sustains life, assimilates waste and enhance the quality of life.

Some of the major environmental problems that we are facing today are: global warming, ozone depletion, air and water pollution and destruction of forests.

Regan, 2005 Science & Engineering Indicators, 1991 Environmental Literacy in Science and Society Roland W. Scholz, Claudia R. Binder, 2011-07-21 In an era where humans affect virtually all of the earth's processes questions arise

about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth s ecosystems to prevent collapses and what roles should practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century
