George Eliot

The Essential Man:

Realistic Visionary Peter R. Henriques, 2006 Examines the accomplishments and mistakes made by George Washington discussing why he was sensitive to criticism and slow to accept blame but still managed to envision a free and united America

Ethics and the Will Friedrich Waismann, Josef Schächter, Moritz Schlick, 2012-12-06 The contribution made by the Vienna Circle to ethics and the philosophy of action is increasingly being recognized Here two previously unpublished pieces by Moritz Schlick and his pupil Josef Schächter set the scene showing how ethics is not dependent on metaphysics but does require a sensitivity to strata of language other than that of science Schächter author of Prolegomena to a Critical Grammar also in the VCC and now doyen of educational philosophers in Israel further develops this ethical theme in a too little known study of pessimistic dicta that he published in 1938 He succeeds without ever assenting to it in giving sense to the idea that it were better for a man never to have been born The bulk of the book is devoted to two works by Friedrich Waismann probably written not long after his emigration to England also in 1938 There are a paper on ethics and science which defends the Wittgensteinian view that morality is something one cannot defend but only profess and itself more than half the volume a treatise on will and motive where the influence of Wittgenstein is mediated by that of Ryle and where many points in modern theory of action are anticipated with the author's usual sensitivity both to language and to the complexity of the human situation Joachim Schulte recently edited these two works in the original German otherwise they have remained unpublished This valuable addition to the VCC should illuminate both the history of the Circle and the kind of reflection on language and action which dominates the practical philosophy of our own day **Complete Works** George Eliot, 2023-12-17 The Complete Works of George Eliot presents an extraordinary compilation of the writings of one of the most influential authors of the Victorian era This comprehensive volume encompasses her major novels essays and poetry demonstrating her mastery of psychological insight and social commentary Eliot's literary style is characterized by a deep understanding of human nature richly drawn characters and a narrative voice that invites readers into the complexities of everyday life The works explore themes of morality spirituality and societal constraints reflecting the broader intellectual currents of 19th century thought such as realism and the emerging ideas of feminism and social reform George Eliot born Mary Ann Evans overcame the constraints of her time to emerge as a leading literary figure defying societal expectations of women Her personal experiences including her unconventional relationships and intellectual pursuits deeply influenced her writing Eliot's commitment to exploring the intricacies of human emotion and moral dilemmas are evident throughout her works making her a pivotal figure in the transition of literature towards modernism This collection is essential for readers seeking to understand the evolution of narrative fiction and its social implications Eliot's acute observations and profound philosophical inquiries make the Complete Works a timeless resource appealing to scholars and casual readers alike **Josef Schächter: Philosophical Writings and Documents in the Context of the Vienna Circle: Volume II** Esther

Heinrich-Ramharter, Friedrich Stadler, 2025-03-29 This book contains a selection of texts written by the Rabbi and Vienna Circle member Josef Schachter after his emigration to Palestine Israel These are the most relevant of those texts dealing with the Vienna Circle and its method They were mostly written in Hebrew and are here available in English for the first time Schachter's writings are supplemented by a transcript of an interview with him a report by his grandson Asher Schechter and further documentation of relevance

Jacob Boehme John Yost Stoudt, 2004-10-08 Jacob Boehme the German religious mystic of the late sixteenth and early seventeenth centuries had an astounding influence on the history of Western philosophy The impact of his thought left its mark on such men as Hegel Schopenhauer Nietzsche Bergson Heidegger and especially through his ideas concerning creation and evil he was a power in the speculative theology of the nineteenth century This fresh study of Jacob Boehme's life and writings not only presents a concrete and vivid picture of Boehme's personal affairs and of the spiritual situation of Protestant Germany more than three hundred years ago it also demonstrates for the first time the development and growth of Boehme's thought Utilizing new biographical sources and newly discovered manuscripts the author has in addition analyzed Boehme's speculative system in its mature form after he had worked through his strange symbolic language to a more traditional synthesis This is an objective examination of Boehme's life and thought It avoids depicting him either as a heaven blessed saint or a Baroque Faust On the basis of the evidence now available Dr Stoudt offers a new portrait of Boehme as the proponent of a theology that stresses feeling and intuition instead of reason and intellect As Paul Tillich states in his Foreword to this volume John Stoudt's book will be a help to all philosophers and theologians who desire an introduction to one of the most profound and strangest systems of Western thought strange in comparison to the prevailing method of modern philosophy profound in comparison with much theism in modern theology

Perspectival Thinking John Digby Haynes, 2000

Far Afield Vincent Debaene, 2014-04-04 Anthropology has long had a vexed relationship with literature and nowhere has this been more acutely felt than in France where most ethnographers upon returning from the field write not one book but two a scientific monograph and a literary account In *Far Afield* brought to English language readers here for the first time Vincent Debaene puzzles out this phenomenon tracing the contours of anthropology and literature's mutual fascination and the ground upon which they meet in the works of thinkers from Marcel Mauss and Georges Bataille to Claude Lévi Strauss and Roland Barthes The relationship between anthropology and literature in France is one of careful curiosity Literary writers are wary about anthropologists' scientific austerity but intrigued by the objects they collect and the issues they raise while anthropologists claim to be scientists but at the same time are deeply concerned with writing and representational practices Debaene elucidates the richness that this curiosity fosters and the diverse range of writings it has produced from Proustian memoirs to proto surrealist diaries In the end he offers a fascinating intellectual history one that is itself located precisely where science and literature meet

Syrianus: On Aristotle Metaphysics 13-14 Syrianus, 2014-04-22 Until the launch of this series in 1985 the 15 000 volumes of the ancient Greek

commentators on Aristotle written mainly between 200 and 600 AD constituted the largest corpus of extant Greek philosophical writings not translated into English or other European languages Syrianus originally from Alexandria moved to Athens and became the head of the Academy there after the death of Plutarch of Athens Syrianus attacked Aristotle in his commentary on Books 13 and 14 of the Metaphysics just as his pupil Proclus was to do later in his commentaries on Plato This is because in Metaphysics 13 14 Aristotle himself was being thoroughly polemical towards Platonism in particular against the Academic doctrine of Form numbers and the whole concept of separable number In reply Syrianus gives an account of mathematical number and of geometrical entities and of how all of these are processed in the mind which was to influence Proclus and all subsequent Neoplatonists *Catalog of Copyright Entries.
