**Gilles Grin**

## **The European Challenge Industrys Response To The 1992 Programme The European Initiative:**

**Battle Of Single European Market** Gilles Grin, 2012-11-12 First published in 2004 This book studies the history of the single or internal market of the European Union since its beginnings after the Second World War until the end of 2000 The perspective is pluridisciplinary and incorporates several dimensions historical political economic legal and sociological

**European Communities** John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community s target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

The New Europe Susan Senior Nello, 1991 Examines the history of economic relations between the European Community and the Eastern Bloc up until 1989 The book then turns its attention to the political and economic reforms that are being carried out in Eastern Europe and considers how this has altered the nature of economic relations

**The External Implications of European Integration** Kym Anderson, 1993 Examines the effects of European integration outside Europe where different perceptions of the Single European Market are held The text argues that both the intentions of the EC and the impact of the Community s actions on other countries have been played down by the Commission

Inefficiency in Industry David G. Mayes, Chris M. Harris, Melanie Lansbury, 1994 The authors of this book examine the nature and causes of inefficiency in manufacturing industry They provide a detailed examination of the nature of inefficiency and the issues involved in its measurement A detailed examination of inefficiency in Australian and British industry is made with an identification of the sources of inefficiency and a comparison of the two countries The implications for government policy and industrial strategy are analyzed

**Prospective Europeans** John Redmond, 1994 This book is concerned with the

future shape of Europe in the post 1992 post Maastricht era The Community has been using the single market programme and the Maastricht treaty as a means of deflecting or at least delaying dealing with the attentions of its immediate neighbours The various initiatives that have been undertaken the European Economic Area with EFTA the Europe agreements with Poland Hungary and Czecho Slovakia and the redirection of the EC s Mediterranean policy have provided only partial and temporary responses The fundamental issue of where the boundary of the European Community should end remains to be settled In this book the authors provide an examination of the underlying issues and the current state of play regarding likely future enlargement of the EC and consider each of the principal actual or potential applicant countries in turn

**International Affairs Review** ,1997      *Impact of EC Integration on Asian Industrializing Region* Mitsuru Toida,1994      **The British National Bibliography** Arthur James Wells,1994      **Language, Culture and Communication in Contemporary Europe** Charlotte Hoffmann,1996 This book offers a multidisciplinary approach to the consideration of aspects of Europe s linguistic and cultural heritage The ten contributions explore the relationship between language culture and modern communication either taking Europe as a whole or looking at specific countries The authors backgrounds and expertise span a number of disciplines from linguistics sociolinguistics and translation studies to information technology and cultural studies
