Atkins M.D. **Routledge Library Editions: Historiography** Various, 2021-06-23 The greatest problem in historical scholarship, theoretically and practically, is the relation between historians and their subject matter. The past is gone and historians can only study its remnants. On what basis do scholars select certain facts from the mass of data left from the past? How do they explain the interrelationship of the facts they select? What criteria do they use to evaluate their subject? The 35 volumes in this set, originally published between 1926 and 1990, discuss and answer these essential questions faced by historians. The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture. Both historiography and historical thinking advanced as never before. The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought. One consequence was extensive organization and professionalization of research, which the volumes in this set reflect. **Routledge Library Editions: The Labour Movement** Various, 2021-07-28 This set of 44 volumes, originally published between 1924 and 1995, amalgamates a wide breadth of research on the Labour Movement, including labour union history, the early stages and development of the Labour Party, and studies on the working classes. This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject, how it has evolved over time, and will be of particular interest to students of political history. **Building Computer Vision Projects with OpenCV 4 and C++** David
