Situating Feminism Vol 2 From Thought To Action:

Situating Feminism Sondra Farganis, 1994-06-07 Feminist theory has undergone continuous evolution since its recognized establishment in 1963. Sondra Farganis's insightful volume revisits feminist philosophy's turbulent beginnings and explores the myriad political and social factors influencing its development during the past three decades. The author also considers the interaction between feminism and the greater women's movement, discussing not only the commonalities but the differences among women of various cultures and experiences. Finally, she recounts four of the most controversial women-centered court cases of recent years, identifying elements of feminist theory and how they affected or were affected by the social and political context in which they occurred. Inspiring new directions in critical thought and theoretical advancement, *Situating Feminism* will prove an essential resource for students and professionals in the areas of women's and culture studies, political science, social work, communication, and psychology. Sondra Farganis does not shy away from rigorous arguments or moral issues dealing directly with the relationship of postmodernism and feminism and the concerns that the former undermines the latter. She capably moves among writers like Berger and Luckman, Freire, Habermas, and Butler. Ultimately, the strength of this book is its ability to present a wide range of feminist political and social theories in a coherent fashion while demonstrating its application to actual real-life situations.

Affilia Sondra Farganis has written a concise study on the situation of feminist thought in relation to contemporary social controversies. She analyzes the Nussbaum domestic violence and victimization, Baby M motherhood and surrogacy, Sears employment and affirmative action, and Hill-Thomas race and sexual harassment cases in a broad theoretical context. Farganis outlines major themes and conflicts within feminist thought, illustrating how these played out in the resolution of the cases.

Choice [Inclusion as Social Justice](#), 2020-07-13

Inclusion as Social Justice: Theory and Practice in African Higher Education discusses the extent to which education enables equitable social access for diverse student populations in the context of historical sidelining of indigenous knowledge systems and epistemic injustice of colonial epistemologies in Africa. The goal is to theoretically unpack the social differentials and micro inequities that practically disempower diverse students in African higher education. To this end, the book features aspects of diversity such as gender, rurality, refugee status, and disability in general, with hearing and visual impairment as prime illustrations. It is argued that despite the ethically defensible and socially just policy and structural interventions for transforming higher education meant to redress the legacy of colonial injustices, urban universities present epistemological equity challenges for students from rural communities. Similarly, the opaque fate of students displaced from their home countries and currently studying in universities in host countries is analyzed. The book illustrates the access case for gender and disability in higher education using empirical studies and examples from Tanzania, Kenya, Ethiopia, Zimbabwe, and South Africa. Challenges facing students in higher education in these countries and the strategies the students devise to succeed in the institutions are analyzed.

Feminist Reconstructions in Psychology Mary Gergen, 2000-10-03 Feminist Reconstructions in Psychology introduces a distinctive new mode of doing psychology This psychology is based on an increasingly popular range of ideas called social constructionism Within the book new forms of theory and methods of inquiry relating social constructionism to feminist topics are introduced Each chapter highlights different topics of special concern within gender studies especially the psychology of women The first chapter outlines the purposes of the book and positions social constructionism in relation to the more traditional feminist psychologies empiricist and feminist standpoint Given the trend toward social constructionism the author thinks the broad audience of people doing gender work will be interested in becoming familiar with this approach to the field The second and third chapters are focused on narrative methods as a means for studying gender differences in popular autobiographies The discussions center on differences in stories of achievement family love and embodiment Quotations from well known personalities such as Donald Trump and Martina Navratilova enrich the text The fourth fifth and sixth chapters involve issues of menopause with a focus group methodology a historical look at the male gaze as it is poised on the Naked Maja painting by Goya and how relationships function within imaginal conversations The two final chapters in the book are exemplars of a recent innovation in the field called performative psychology One monologue is about aging in contemporary society and the other is a feminist critique of aspects of postmodernism itself The book draws from the central tenets of postmodern inquiry as played out in the positive framework of social constructionism Emphasized are reflexivity the social basis of reality making the breakdown of traditional narrative forms the loss of objectivity as a scientific standard and the possibilities for new forms of doing research In this respect the book is unique and serves to provide a point of view on an intriguing movement that is gaining momentum across the social sciences and humanities It is hoped that this book might serve as a catalyst for further innovative work in psychology This text encourages such moves by its own irreverence for traditions and its overt efforts to break down resistances to creativity in the field
