Functional Properties of Food Components Yeshajahu Pomeranz, 2012-12-02

Functional Properties of Food Components reviews the roles and functions of specific components in foods. It addresses three main questions: What in the biochemical make up of food components makes them tick in the production of desirable and acceptable foods? Why do those components/entities perform the way they do and often why do they fail to perform as expected? Which functions continue to be elusive and require more searching and probing? The book is organized into three parts. Part I discusses specific food components such as water, carbohydrates, corn sweeteners and wheat carbohydrates, proteins, lipids and enzymes. Part II deals with food additives and foods of the future and reviews the role of components in four well established foods: dairy, wheat, flour, malt and soybean products. Part III presents the available information and documentation on food components. This book is intended for the undergraduate with a background in the general biochemistry of natural materials but is also interested in specific information on the function of those components in foods. It is also meant for the food scientist or technologist who is familiar with food formulation and production and for any other interested reader with an appropriate background, whether managerial or scientific.

God and Grace of Body David Brown, 2011-02-03

An exploration of the ways in which the symbolic associations of the body and what we do with it have helped shape religious experience and continue to do so. David Brown writes excitingly about the potential of dance and music including pop, jazz and opera to enhance spirituality and widen theological horizons.

Traditional European Breads Marco

Garcia-Vaquero, Kristian Pastor, Gul Ebru Orhun, Anna McElhatton, João Miguel F. Rocha, 2023-05-16

This text comprehensively covers the rituals, traditions and receipts of ancestral processes of bread making from multiple countries, including the scientific and technological character of the science of bread making and sourdough biotechnology. Individual chapters cover the scientific aspects of bread making in different cultures and traditions as well as the technological phenomena occurring during the bread making process utilizing the full network of SOURDOMICS from the COST initiative. Pictures and illustrations are used to explain the science behind bread making processes and the cultural, historical and traditional elements associated with bread making in multiple countries. Authored by bread making experts from the breadth of Europe, the process of bread fermentation in each country and region is covered in detail. The traditions surrounding bread making are simply the empirical know-how passed between generations and this book's main purpose is to perpetuate these traditions and know-how. Provides a description of the culture of European peoples with respect to the technology of bread making and sourdough biotechnology. Explains the process of bread fermentation using simple language combined with

scientific rigor High quality pictures and illustrations enrich the scientific and cultural elements mentioned in each chapter
