Territory Of Information Pragmatics And Beyond New Series:

Territory of Information Akio Kamio, 1997-07-03 Most higher animals are said to be territorial as a huge amount of work in ethology has made it clear Human beings are no exceptions They tend to occupy a certain space around them where they claim their own presence and exclude others quite naturally If territory is so prevalent among higher animals including humans then isn't it possible to observe its manifestations in aspects of human language Territory of Information starts from this fundamental question and attempts to demonstrate the key function of the concept of territory in the informational structure and syntax of natural language It offers an analysis of English Japanese and Chinese in terms of territory and shows its fundamental importance in the interface of information and syntax in these languages Moreover it argues that the concept of territory plays a major role in the evidentiality of a number of languages and in the linguistic structure of politeness It also makes much reference to discourse and conversational analysis Thus this is a book which might interest readers concerned with pragmatics in general the relationship between informational structure and syntax evidentiality politeness discourse analysis and conversational analysis *Certainty-uncertainty - and the Attitudinal Space in Between* Sibilla

Floyd, Elisabeth Norcliffe, Lila San Roque, 2018-04-15 Egophoricity refers to the grammaticalised encoding of personal knowledge or involvement of a conscious self in a represented event or situation Most typically a marker that is egophoric is found with first person subjects in declarative sentences and with second person subjects in interrogative sentences This person sensitivity reflects the fact that speakers generally know most about their own affairs while in questions this epistemic authority typically shifts to the addressee First described for Tibeto Burman languages egophoric like patterns have now been documented in a number of other regions around the world including languages of Western China the Andean region of South America the Caucasus Papua New Guinea and elsewhere This book is a first attempt to place detailed descriptions of this understudied grammatical category side by side and to add to the cross linguistic picture of how ideas of

self and other are encoded and projected in language The diverse but conceptually related egophoric phenomena described in its chapters provide fascinating case studies for how structural patterns in morphosyntax are forged under intersubjective interactional pressures as we link elements of our speech to our speech situation

Intention, Common Ground and the Egocentric Speaker-Hearer Istvan Kecskes, Jacob Mey, 2008-11-03 This book presents current research that discusses some of the major issues in pragmatics from new perspectives and directs attention to aspects of fundamental tenets that have been investigated only to a limited extent Current pragmatic theories emphasize the importance of intention cooperation common ground mutual knowledge relevance and commitment in executing communicative acts However recent research in cognitive psychology linguistic pragmatics and intercultural communication has raised questions that warrant some revision of these major tenets Debates about the place of intention in pragmatics have indicated that Gricean intentions may play a less central role in communication than traditionally assumed Cognitive psychologists pointed out that individual egocentric endeavors of interlocutors play a much more decisive role in the initial stages of production and comprehension than current

pragmatic theories envision Some researchers criticized the Clark and Brennan s common ground model and Clark s contribution theory arguing that these approaches retain a communication as transfer between minds view of language and treat intentions and goals as pre existing psychological entities that are later somehow formulated in language All these developments are addressed in the papers of the volume written by prominent scholars representing several disciplines
