The Party Politics of Territorial Reforms in Europe Emanuele Massetti, Simon Toubeau, 2020-07-24. The book analyses how political parties compete and strategise on the issue of territorial reform using case studies that include countries from both Western Belgium, Germany, Italy and Spain and Central Eastern Europe Poland, Slovakia and Romania. Each case study considers different drivers of decentralization such as territorial identities and the demands of regionalist parties for territorial autonomy or independence, efficiency concerns related to issues of uneven economic development and economic competitiveness, the pressure from supra-national organizations especially the EU as well as different combinations of these drivers. They also consider how the ideology and organisation of state-wide parties and the institutional context in which they compete shape their responses to these drivers and their strategy towards the question of territorial reform. This collection investigates the logic of the actions that guide political parties' strategy to highlight trends that are apparent across the case studies. This book was originally published as a special issue of *West European Politics*.

The Max Planck Handbooks in European Public Law: Volume I: The Administrative State Sabino Cassese, Armin von Bogdandy, Peter Huber, 2017-07-24. The Max Planck Handbooks in European Public Law series describes and analyses the public law of the European legal space, an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and, importantly, the domestic public laws of European states. Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners, it aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency of European public law. The first volume of the series begins this enterprise with an appraisal of the evolution of the state and its administration with cross-cutting contributions and also specific country reports. While the former include, among others, treatises on historical antecedents of the concept of European public law, the development of the administrative state as such, the relationship between

constitutional and administrative law and legal conceptions of statehood the latter focus on states and legal orders as diverse as e g Spain and Hungary or Great Britain and Greece With this the book provides access to the systematic foundations pivotal historic moments and legal thought of states bound together not only by a common history but also by deep and entrenched normative ties for the quality of the *ius publicum europaeum* can be no better than the common understanding European scholars and practitioners have of the law of other states An understanding thus improved will enable them to operate with the shared skills knowledge and values that can bring to fruition the different processes of European integration

cases reaching as far back as the seventeenth century this book shows how changing definitions of administrators roles reflect their position in society and permit the exploration of changing socialization processes The long time span also shows how factors such as administrative intervention can change from being marginally important to crucial in affecting economic growth From the diverse European experience the author distills five factors which he hypothesizes have exerted a constant positive influence on administrative intervention in economic development and suggests how these factors might be applied in analysis of other societies He also provides a wealth of statistical data and an extensive bibliography Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Urban Governance in Southern Europe Abel Albet, 2016-02-11 The concept of governance has evolved into one of the most important but also controversial concepts in urban politics While it encourages co operation participation and collective construction at the same time it has brought about new forms of public demission oligarchic regimes and less local democracy The dilemmas accompanying these changes are particularly relevant when observing the cities of Southern Europe whose socio cultural specificities very much structure local political and policy materialisations Bringing together a team of leading scholars from across the social sciences this volume examines the issues of urban governance in the Southern European context Illustrated by case studies of several main cities and metropolises on the North Mediterranean coast it introduces and critically analyses the latest theories and approaches to urban governance It questions how the real or socio cultural notion of city seems to have been separated from that of the political city and explores how more integrated socio political forms might be developed It looks at current structures dynamics and cultures of governance in urban development and questions whether they are well adapted to new realities and challenges or whether there are significant imbalances causing limited or fragmented political administrative visions By considering both the long Mediterranean history along with the recent but enduring global economic and political developments this book argues that Southern European cities will have to depend greatly upon its own socio cultural networks dynamics and cosmopolitan evolution making the most of the region s characteristic urban strengths as trading hubs with rich hinterlands and large and varied population
