Christopher I. Xenakis, 2002-09-30 Xenakis examines the responses of Soviet experts in American academia primarily political scientists but also economists and defense scholars who specialized in the USSR to the unfolding evidence of Soviet reform during the 1970s and 1980s and to its ultimate collapse He concludes that American Sovietologists and other political scientists were more responsive to the Cold War consensus to the needs of the State Department Defense and CIA policy makers and to the official Washington line of the moment than to the changing face of the Soviet Union As Xenakis makes clear many of the Cold War ideas and attitudes shared by Sovietologists the notion that the USSR was an evil empire the idea that Soviet society was irredeemably xenophobic and indolent that the Soviet political and economic system could not be fixed or reformed and the view that the best way for Washington to deal with Moscow's influence was to contain the USSR through arms races global and proxy wars were reminiscent of the policies and arguments of the Truman and Eisenhower administrations not to the facts on the ground in the 1970s and 1980s An important work for scholars students and researchers involved with Soviet and Russian studies international political and military affairs intellectual history and the relationship between academia and the government *Professionalization of Soviet Society* Alexander

Simirenko, 1982-01-01 *South of the Crisis* Juan E. Corradi, 2012-10 The book examines why and how global capitalism has entered a phase of unsustainable crises of accumulation and legitimacy and looks at various solutions to such crises from mild reform to radical overhaul The book then examines the various scenarios from a Latin American perspective arguing that different countries follow diverse paths in adapting to the crisis with significantly different outcomes Their common challenge is how to achieve economic growth with social inclusion *Notes from Underground* Thomas

Cushman, 1995-07-06 Describes the Russian rock music counterculture and how it is changing in response to Russia's transition from a socialist to a capitalist society It explores the lived experiences the thoughts and feelings of the rock musicians as they meet the challenges of change **The Soldier in Russian Politics, 1985-96** Robert Barylski, 2018-04-17

If Russia is to become a viable democracy it will need a viable state to make and enforce decisions that nurture societal cohesion and sustain complex economic activity Armed forces are essential attributes of viable modern states but what happens when states undergo major structural changes What was the military's contribution to the end of the Soviet Union

and the rise of post Soviet Russia *The Soldier in Russian Politics* is the first study to go beyond familiar accounts of the main events that brought down the Soviet state and began its reconstruction It captures the interplay between soldier and civilian politicians in a major political history based on solid political sociological analysis Barylski uses the study of civil military relations to explore new political and intellectual conditions and explain the historic relationship between changes in Western models of Russian reality and political change in the former Soviet Union Examining the military's participation in every major twentieth century political change from 1917 to 1991 Barylski demonstrates that every deep political transformation in Russia has military dimensions Barylski discusses how the Russian presidency's power to command and control the military without legislative checks and balances led to armed conflict with Parliament in October 1993 and to the Chechen war of 1994 1996 and is unhealthy for long term democratic development Barylski analyzes ministers of defense Yazov Shaposhnikov Grachev and Rodionov as political actors traces the careers of ambitious political soldiers such as Aleksandr Lebed and Aleksandr Rutskoi and describes the military's growing political alienation from the Yeltsin administration His final chapters cover the presidential elections the short lived Yeltsin Lebed political alliance the tensions associated with Yeltsin's ailments and Yeltsin's efforts to rebuild his personal power political effectiveness *The Soldier in Russian Politics* presents political history in an incisive and objective manner It applauds the progressive officers soldiers and politicians where decisions minimized bloodshed and prevented civil war But it also warns that civilian and military leaders can make mistakes which cause political institutional failure violence and dictatorship This book will interest political scientists political sociologists students of Russian and soviet politics and all military historians and professionals

**Globalization against Democracy** Guoguang Wu, 2017-04-24 Globalization has reconfigured both the external institutional framework and the intrinsic operating mechanisms of capitalism The global triumph of capitalism implies the embracing of the market by the state in all its variants and that global capitalism is not confined to the shell of nation state democracy Guoguang Wu provides a theoretical framework of global capitalism for specialists in political economy political science economics and international relations for graduate and undergraduate courses on globalization capitalism development and democracy as well as for the public who are interested in globalization Wu examines the new institutional features of global capitalism and how they reframe movements of capital labor and consumption He explores how globalization has created a chain of connection in which capital depends on effective authoritarianism while democracy depends on capital Ultimately he argues that the emerging state market nexus has fundamentally shaken the existing institutional systems harming democracy in the process

*Rethinking Development* Peter Preston, 2012-07-26 First published in 1987 this volume stresses the importance of development studies for sociology as P W Preston argues that this field of study is emerging from the technical social scientific ghetto back into the mainstream of the classical tradition of social theorizing represented by Marx Weber and Durkheim Preston discusses the position of development studies in relation

to the wider group of the social sciences in general and to sociology in particular Using examples mainly from the study of Southeast Asia he looks at the diversity of available modes of social theoretic engagement and considers the work of the colonial administrator scholar the humanist academic scholar and the scholar who theorises on behalf of the planners discusses the mode of political writing and Marxian analyses of development and considers the particular problems surrounding the elites of post colonial nation states

**Democratization and Revolution in the USSR, 1985-91** Jerry F. Hough, 1997-05-01 Democratization and Revolution in the USSR 1985 91 presents a strikingly new view of the Gorbachev era and the reasons for the collapse of the Soviet Union Written by one of America s most distinguished specialists on the former Soviet Union this is the first comprehensive overview of the Gorbachev period and describes it as a real revolution not mere reform According to Hough despite Mikhail Gorbachev s talk of a regulated market he never understood that a market must be created on a solid institutional and legal base He was determined to use democratization to free himself from party control but he saw democracy as a way of achieving near universal consensus not a mechanism for forcing through difficult choices The many memoirs that have become available in the last few years including those of Gorbachev himself show that Premier Nikolai Ryzhkov and the bureaucrats in his government actually were the serious economic reformers in the leadership Gorbachev opposed the key transitional steps at every stage and was far closer to the assumptions of shock therapy than he or his opponents ever recognized Hough explains that Gorbachev was not alone in thinking that the destruction of old institutions was enough to unleash a market Westerners also talked of leaping a chasm in a single jump as if democratic and market institutions existed pre created on the other side But precisely because Gorbachev and later Boris Yeltsin was encouraged in all his worst mistakes by Western advice his failure has crucial implications for Western thinking about the process of democratization and marketization This unprecedented book explores those implications in depth Selected by Choice as an Outstanding Book for 1998

*Electronic Customer Relationship Management* Jerry Fjermestad, Nicholas C. Romano, 2006 Sustainable strategic management refers to strategic management processes that seek competitive advantages consistent with a core value for environmental sustainability This volume has been designed as a supplement to traditional texts in graduate and undergraduate strategic management courses

**The New Entrepreneurs of Europe and Asia** Victoria E. Bonnell, Thomas B. Gold, 2015-05-20 While attention has been focused on high level struggles over control of giant enterprises in China and the former Soviet bloc a remarkable but underreported revolution has been occurring at the grass roots level This volume examines the profiles of entrepreneurs and the patterns of business development in the post socialist countries Bringing together the perspectives of all the social science disciplines from anthropology through economics and political science to sociology the contributors identify the criteria for survival and success of independent businesses in different environments Their findings shed light not only on the transition from socialism at the micro level but also on the conditioning effects of different economic historical legal and social conditions on

the conduct of independent economic initiatives      *Permanent Revolution* Sigmund Neumann, 2023-10-16 Permanent Revolution stands out as a classic study of the social structure of totalitarian rule The problem of totalitarianism and democracy is still with us and Neumann's dictum that it is much more than a problem of constitutional structure of economic progress it is above all the difference in basic human concepts is as valid today as it was in 1942 Neuman's analysis of dictatorship opens a new approach to political dynamism for the democracies For it deals ultimately with a lasting problem the dignity and personal responsibility of the individual from the Preface by Hans Kohn      *Cadres and Corruption* Xiaobo Lü, 2000 The most up to date and comprehensive analysis of corruption and change in the Chinese Communist Party *Cadres and Corruption* reveals the long history of the party's inability to maintain a corps of committed and disciplined cadres Contrary to popular understanding of China's pervasive corruption as an administrative or ethical problem the author argues that corruption is a reflection of political developments and the manner in which the regime has evolved Based on a wide range of previously unpublished documentary material and extensive interviews conducted by the author the book adopts a new approach to studying political corruption by focusing on organizational change within the ruling party In so doing it offers a fresh perspective on the causes and changing patterns of official corruption in China and on the nature of the Chinese Communist regime By inquiring into the developmental trajectory of the party's organization and its cadres since it came to power in 1949 the author argues that corruption among Communist cadres is not a phenomenon of the post Mao reform period nor is it caused by purely economic incentives in the emerging marketplace Rather it is the result of a long process of what he calls organizational involution that began as the Communist party state embarked on the path of Maoist continuous revolution In this process the Chinese Communist Party gradually lost its ability to sustain officialdom with either the Leninist cadre or the Weberian bureaucratic mode of integration Instead the party unintentionally created a neotraditional ethos mode of operation and set of authority relations among its cadres that have fostered official corruption

**Stalin's Economist** André Mommen, 2011-04-06 This book analyses the contribution of Eugen Jen Varga 1879 1964 on Marxist Leninist economic theory as well as the influence he exercised on Stalin's foreign policy and through the Comintern on the international communist movement During the Hungarian Councils Republic of 1919 Varga was one of those chiefly responsible for transforming the economy into one big industrial and agrarian firm under state authority After the fall of the revolutionary regime that year Varga joined the Hungarian Communist Party soon after which he would become one of the Comintern's leading economists predicting the inevitable crisis of the capitalist system Varga became the Soviet Union's official propagandist As an economic specialist he would advise the Soviet government on German reparation payments and unlike Stalin believed that the capitalist state would be able to plan post war economic recovery which contradicted Stalin's foreign policy strategy and led to his disgrace Thus by the beginning of the Cold War in 1947 Varga was discredited but allowed to keep a minor academic position After Stalin's death in 1953 he reappeared as a well respected economist whose

political influence had nonetheless waned In this study Mommen reveals how Stalin's view on international capitalism and inter imperialist rivalries was profoundly influenced by debates in the Comintern and by Varga's concept of the general crisis of capitalism Though Stalin appreciated Varga's cleverness he never trusted him when making his strategic foreign policy decisions This was clearly demonstrated in August 1939 with Stalin's pact with Hitler and in 1947 with his refusal to participate in Marshall's European Recovery Plan This book should be of interest to a wide variety of students and researchers including those concentrating on the history of economic thought Soviet studies international relations and European and Cold War history
