problems that this can cause Trauma and violence are often associated with the migration process and even where they are not migration and immigration represent a massive challenge to individuals which frequently involves loss of identity alienation and discrimination This book is a collection of 16 papers from the NATO sponsored meeting entitled Perspectives on Immigration and Terrorism which took place in Milan Italy in March 2010 and which focused on the psychological and socio cultural precursors to the radicalization of immigrant youth in Europe Some of the topics explored include factors of cultural and ideological opposition to western societies the growing pressure of the process of secularization illegal aspects of terrorism immigration as a possible trajectory for political radicalism the interaction between traumatic experience and immigration acculturation and adjustment to a new culture potential predictors of terrorist behavior and the role of a sense of national belonging The book provides many perspectives on the way in which vulnerability to radical ideology may develop among individuals whose lack of personal and social resources may result in alienation frustration and desperation It also offers solutions which might be implemented to mitigate or prevent this problem

*Psychology of Terrorism* Bruce Michael Bongar, 2007 Publisher description *Preparing for the Psychological Consequences of Terrorism* Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Responding to the Psychological Consequences of Terrorism, 2003-08-26 The Oklahoma City bombing intentional crashing of airliners on September 11 2001 and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result Preparing for the Psychological Consequences of Terrorism highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to the psychological consequences of a variety of terrorism events can be formulated The report includes recommendations for the training and education of service providers ensuring

**The Psychology of Counter-Terrorism** Andrew Silke, 2010-10-26 This work firstly aims to provide balanced and objective insight into the psychology of terrorists what their motivations are what keeps them involved in terrorist groups and what eventually forces most to end their active involvement in terrorism Secondly the contributors focus on the challenging issue of how to respond to terrorism These chapters provide information for those concerned with short term tactical problems e g interviewing as well as those looking towards the more long term strategic questions of bringing an entire terrorist campaign to an end Ultimately the individuals involved in terrorism require a more complex response from society than simply a quest for their apprehension Believing inaccurate and misleading characterizations leads inevitably to damaging policies and deficient outcomes with campaigns of violence being needlessly prolonged It is from this perspective that the concern arises with how researchers and the policy makers guided by them perceive the psychology of terrorists and of terrorism

**Perspectives on Countering Extremism** Shashi Jayakumar, 2023-02-09 The study of violent extremism has seen a great deal of academic and practitioner focus on the processes of radicalization and strategies to counter and de radicalize extremists Comparatively little has been written on the subject of Diversion early upstream interventions aimed at deflecting individuals from a pathway of radicalization This volume addresses this gap in scholarship by analyzing the strategies being deployed worldwide aimed at diverting or deflecting individuals and communities from the path of radicalization Disengagement which is often necessary when one has already progressed past the at risk stage is also addressed given that social workers counselors and other practitioners do not necessarily find the distinction between the two a critical issue in practice What matters is which upstream approaches work and what shows promise amongst individuals and communities Case studies range across the Global North and South presented by both academics and practitioners Contributions address approaches that have proven useful strategies which should be given deeper scrutiny before being employed and what should be avoided
