Test Policy in Defense

Bernard R. Gifford, Linda C. Wing, 2012-12-06 Bernard R Gifford and Linda C Wing Standardized testing has become a ubiquitous feature of American life As a major source of information for reducing uncertainty in the allocation of merit based educational training and employment opportunities testing affects the life chances of individuals Moreover testing influences the way in which our society judges itself and provides for our collective future Test scores may determine a child's admission to kindergarten and promotion to the first grade Most states award the high school diploma only if a student has passed a minimum competency test Major institutions of higher education typically require applicants to supplement their records of academic achievement with scores on college admissions tests In the labor market as a condition of employment or assignment to training programs more and more employers are requiring workers to sit for personnel selection tests Additionally it has become commonplace to use test scores to calibrate our national sociopolitical condition and our capacity to compete with other countries in the global economy In short with increasing frequency and intensity scores on examinations that purport to be objective and precise measures of individual knowledge abilities and potential are playing a critical role in the opportunity marketplace Similarly test scores are exercising growing influence in assessments of our social and economic institutions and in policy decisions about the relative investments that should be made in each In all these instantiations test scores are at the center of high stakes decision making about the future of individuals and of the nation itself

Test Policy and the Politics of

Opportunity Allocation: The Workplace and the Law Bernard R. Gifford, 2012-12-06 Bernard R Gifford In the United

States the standardized test has become one of the major sources of information for reducing uncertainty in the determination of individual merit and in the allocation of merit based educational training and employment opportunities. Most major institutions of higher education require applicants to supplement their records of academic achievements with scores on standardized tests. Similarly in the workplace as a condition of employment or assignment to training programs more and more employers are requiring prospective employees to sit for standardized tests. In short with increasing frequency and intensity individual members of the political economy are required to transmit to the opportunity marketplace scores on standardized examinations that purport to be objective measures of their and potential. In many instances these test scores are the abilities talents only signals about their skills that job applicants are permitted to send to prospective employers.

THE NATIONAL COMMISSION ON TESTING AND PUBLIC POLICY In view of the importance of these issues to our current national agenda it was proposed that the Human Rights and Governance and the Education and Culture Programs of the Ford Foundation support the establishment of a blue ribbon National Commission on Testing and Public Policy to investigate some of the major problems as well as the untapped opportunities created by recent trends in the use of standardized tests particularly in the workplace and in schools.

Wu, 2019-11-19 As the demand for English language education grows in Asia there has been a parallel growth in the development and implementation of standardized tests at the local level. How Testing Came to Dominate American Schools Gerard Giordano, 2005 Although originally designed as instruments to gauge students progress tests eventually were used to modify curricula learning materials pedagogy and many practical features of schooling Tests were employed to shape attitudes toward national issues such as employment immigration and defense Worried about the enormous consequences that were at stake advocates and opponents pitched their cases to educators parents journalists and policymakers and also targeted special audiences Testing proponents pleaded with military leaders businesspeople and scholastic publishers while their adversaries appealed to job seekers college applicants racial minorities and anti establishmentarians This book illustrates how all of these parties showed interest many became passionate and some decisively influenced the course of American educational testing

Army RD & A., 1995 **Army RD & A Bulletin**, 1996 **Public Examinations Examined** Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems They affect both teacher and student behavior especially at the middle and upper levels of secondary education The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment Examination agencies many of which have followed the same procedures over decades can learn from the successes and failures of other systems This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies The book s primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog
