and research can be established

Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom White, Eddy, Delaney, Thomas, 2018-11-23 The evaluation of student performance and knowledge is a critical element of an educator's job as well as an essential step in the learning process for students. The quality and effectiveness of the evaluations given by educators are impacted by their ability to create and use reliable and valuable evaluations to facilitate and communicate student learning. The Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom is an essential reference source that discusses effective language assessment and educator roles in evaluation design. Featuring research on topics such as course learning outcomes, learning analytics, and teacher collaboration, this book is ideally designed for educators, administrative officials, linguists, academicians, researchers, and education students seeking coverage on an educator's role in evaluation design and analyses of evaluation methods and outcomes.

Theory and Practice in EFL Teacher Education Julia Isabel Hüttner, Barbara Mehlmauer-Larcher, Susanne Reichl, 2012 This volume brings together articles written by experts in the thriving field of language teacher education from a variety of geographical and institutional contexts with a particular focus on EFL.

Setting Performance Standards in Europe Spiros Papageorgiou, 2009 This publication was awarded the Jacqueline Ross TOEFL Dissertation Award in 2009. Since its publication in 2001, the Common European Framework of Reference (CEFR) has been the most frequently cited performance standard in language testing in Europe. To help test providers and users with score interpretation in relation to the CEFR levels, the Council of Europe published the Manual for relating language examinations to the CEFR. Even though the linking process set out in the Manual is primarily based on judgements by trained participants, judgement making in this context remains largely unexplored. The research presented in this book addresses this issue by employing quantitative and qualitative methods. Despite the judges' good understanding of how language ability progresses from lower to higher CEFR levels, it was found that describing test content and examinee performance was not without problems and decision making was affected by a number of factors that were irrelevant to the judgement task. The results provide a better understanding of judgement making during the CEFR linking process, which has important implications for examination providers and users of CEFR-aligned test scores.

The Sociopolitics of English Language Testing Seyyed-Abdolhamid Mirhosseini, Peter De Costa, 2020-02-20 Highlighting marginalized but significant perspectives about the sociopolitical essence of English language tests and testing processes worldwide, this book explores the social considerations of testing theories and practices from a critical perspective. Investigating concerns surrounding power inequalities, The Sociopolitics of English Language Testing takes a socially situated view of language assessment, bringing sociopolitical understandings of language teaching, learning, and assessment to the forefront in the field. Within the broader discussion of the politics of test use, an international team of language and education experts address the issues of ideology, diversity, power, and dominance in English language testing. Through socially sensitive theoretical as well as empirical discussion and investigation of English language testing, this book

offers valuable insights not only to applied linguists and the language education community who have focused on positivistic and cognitively oriented conceptions of language testing but to anyone who wishes to venture beyond the traditional bounds of the field *Handbook of Second Language Assessment* Dina Tsagari, Jayanti Banerjee, 2016-03-07

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment, with chapters on the purposes of assessment and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills, including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of voice in second language assessment, and assessment literacy for teachers and other test and score users. **Relating Language**

Examinations to the Common European Framework of Reference for Languages José Noijons, European Centre for Modern Languages, Council of Europe, 2011-01-01. In response to a growing need expressed by the users of the CEFR, the Language Policy Division developed a manual and a set of accompanying tools to be used to assist in linking local language examinations to the common reference levels of language proficiency. This publication seeks to complement these tools by providing a user-friendly introduction to the process, targeting professionals with a stake in quality language testing who are not necessarily experts in testing and assessment. Relating an examination or test to the CEFR can best be seen as a process of building an argument. The publication presents five inter-related sets of procedures that users are advised to follow in order to design a linking scheme in terms of self-contained, manageable activities. Assessment for Language Teaching Aek Phakiti, Constant Leung, 2024-04-30. This Element reviews the key foundational concepts, beliefs, and practices underpinning approaches to assessment in English Language Teaching. Exploring major concepts and practices through educational, social, and ethical perspectives, it offers theoretically informed and close-to-practice descriptions and up-to-date explanations of the affordances and limitations of different assessment approaches related to language teaching. This Element presents a cohesive and pragmatic framework that allows teachers to efficiently implement tests and assessments in their contexts.

Understanding Language Testing Dan Douglas, 2014-03-18 Understanding Language Testing presents an introduction to language tests and the process of test development that starts at the very beginning. Assuming no knowledge of the field, the book promotes a practical understanding of language testing using examples from a variety of languages. While grounded on solid theoretical principles, the book focuses on fostering a true understanding of the various uses of language tests and the process of test development, scoring test performance, analyzing and interpreting test results, and above all, using tests as ethically and fairly as possible so that test takers are given every opportunity to do their best to learn as much as possible and feel positive about their language learning. Each chapter includes a summary, suggestions for further reading, and exercises. As such, this is the ideal book for both beginning students of linguistics and language education or anyone in a related discipline looking for a first introduction to language testing.
