Brown, H. Douglas (2004). *Language assessment: Principles and classroom practices*. White Plains, NY: Pearson Education. 324 pp. \$48.00 paper. ISBN 0–13–098834–0.

Brown, James Dean (2005). *Testing in language programs: A comprehensive guide to English language assessment*. New York: McGraw-Hill. 307 pp. \$32.85 paper. ISBN 0–07–294836–1.

Two new textbooks for introductory courses on language testing differentially clarify basic principles of language assessment for relatively similar audiences. Both H. Douglas Brown's *Language Assessment: Principles and Classroom Practices* and James Dean Brown's *Testing in Language Programs: A Comprehensive Guide to English Language Assessment* give excellent and concise summaries of the processes involved in test development, but they differ in that H. D. Brown's book views testing from the standpoint of the teacher in the language classroom, providing, in his own words, 'a clear and reader-friendly' (p. ix) overview of the foundations of second language (L2) testing and specifically avoiding instruction on statistics related to testing – which could be viewed as allowing the course instructor more freedom to teach test statistics in the manner and with supplements he or she chooses. In contrast, J. D. Brown's book engages testing primarily from the viewpoint of the program administrator, giving a step-by-step overview of statistical applications and procedures for testing that, in his own words, 'provide[s] a balance between the technical and practical aspects of language testing that is neither too complex nor too simplistic' (p. x).

The contrast between the two books highlights the fact that many introductory, graduate-level language testing classes often include two different types of students, those from MA or undergraduate TESOL programs who plan to teach and/or be program administrators and

students for tests Implications for teaching and an agenda for research are discussed in a conclusion
