Meloy, 1980 **Food Powders** Enrique Ortega-Rivas, Pablo Juliano, Hong Yan, 2006-04-04 This useful reference is the first book to address key aspects of food powder technology. It assembles organized and updated information on the physical properties, production and functionality of food powder previously unavailable in book form. **Particle Characterization in Technology** J.K. Beddow, 2018-01-18 The first section of volume II deals with both theory and methods of morphological analysis; it then discusses data analysis and finally the applications. *Characterization of Cereals and Flours* Gonul Kaletunc, Kenneth J. Breslauer, 2019-07-17 *Characterization of Cereals and Flours* is a state-of-the-art reference that details the latest advances to characterize the effects of manufacturing processes and storage conditions on the thermal, mechanical and structural properties of cereal flours and their products, examining the influence of moisture absorption, storage temperature, baking and extrusion processing on flour and cereal product texture, shelf life and quality. The book discusses the influence of additives on pre and postprocessed food biopolymers, the development of databases and construction of state diagrams to illustrate the state and function of cereal flours before, during and after production, and the current techniques in image analysis, light and electron microscopy and NMR spectroscopy used to analyze the microstructure of cereal products. It also discusses the methods used to optimize processing parameters and formulations to produce end products with desirable sensory and textural properties, the shelf life of cereal products and the relationships between the sensory and physical characteristics of cereal foods.
