**Evaluating Family-Based Services** Peter J. Pecora,2018-02-06 Family based service FBS programs have been developing rapidly across the country at a time of increasingly scarce human resources and in a politically volatile climate. Such a context has made evaluation of such programs imperative. The present volume reviews basic elements of evaluation in the light of current knowledge and then highlights the most useful research instruments for measuring changes in child and family functioning. Chapters focus on evaluation methods that can be employed to determine the success of existing policy and to influence the development of new policy. The authors assume that their readers will have a basic familiarity with research methods and program evaluation. They discuss the challenges they have encountered in conducting extensive research on family preservation, family support, and other related programs and pose practical solutions for administrators, practitioners, and evaluators confronted with similar difficult issues. Each chapter presents a brief conceptual framework for understanding issues related to assessment. Essential elements are reviewed while research design, measurement variables, and qualitative and quantitative analyses are discussed in turn. The book concludes with a review of the limitations of evaluations.      Testing Children Sampson Joseph Weaver,1984 The purpose of the book was originally to offer a relatively

brief manual on the essentials of psychological assessments for the general classes of problems in children and youth that present themselves to psychologists in general practice. There are few psychological training programs that train clinicians to specialize in children. Experts in child clinical psychology have lamented the failings of adult oriented training programs in preparing practitioners to work with children and youth. Since adult programs make up the overwhelming majority of psychology programs in existence, many psychologists who subsequently take positions in general practices find themselves faced with assessments for which they have had minimal training.      **Play Therapy Treatment Planning and**

The activity descriptions are very practical and are geared to the child clients specific developmental level. Play Therapy Treatment Planning and Interventions presents guidelines for interviewing clients and their parents as well as pretreatment assessment. The book provides guidance on data gathering for the intake process and case conceptualization. Case examples and completed sections of the workbook quotes and lists increase the text's

comprehension The entire workbook is provided in text format and on disk It provides the therapist with an easy to use format for recording critical case information specific treatment goals and the overall treatment plan Presents a comprehensive theory of play therapy and a comprehensive model of play therapy intervention Clearly relates the theoretical model to the interventions Provides examples of the application of both the theory and the intervention model to specific cases Provides a structure by which the reader can apply the theory and intervention model to his or her own cases Describes actual play therapy activities and identifies how therapists can prepare for the session implement the activity and the outcome they may expect Describes play activities clustered according to the developmental level of the children to which they are best suited Workbook format provides the reader with a method for obtaining comprehensive intake and assessment data organizing that data into a case formulation and treatment goals and then developing a comprehensive treatment plan Provides a blank copy of the workbook as well as the workbook on disk for use in ones own practice
