*Changing National Identities at the Frontier* Andrés Reséndez, 2005 This book explores how the diverse and fiercely independent peoples of Texas and New Mexico came to think of themselves as members of one particular national community or another in the years leading up to the Mexican American War Hispanics Native Americans and Anglo Americans made agonizing and crucial identity decisions against the backdrop of two structural transformations taking place in the region during the first half of the 19th century and often pulling in opposite directions

**Environmental Federalism** Luke Fowler, 2020-06-02 In Environmental Federalism Luke Fowler helps to refocus much needed attention on the role of state governments in environmental policy creation and implementation in the United States While the national government receives most of the attention when it comes to environmental policy state governments play a vital role in protecting our natural resources Legacy problems like air water and land pollution present one set of challenges for environmental federalism but new problems emerging as a result of climate change further test the bounds of federal institutions Examining patterns of pollution and case studies from the Clean Air Act and the Clean Water Act Fowler explores two questions has environmental federalism worked in managing legacy environmental problems and can it work to manage climate change In order to answer these questions Fowler extends James

Lester's typology using political incentives and administrative capacities to identify four types of states: progressive, delayers, strugglers, and regressives, and assesses how they are linked to the success of federal environmental programs and conflicts in intergovernmental relations. He then considers what lessons we can learn from these programs and whether those lessons can help us better understand climate policy and multi-level institutions for environmental governance. This timely read will be a valuable contribution to students, researchers, and scholars of political science, public policy, public administration, and environmental studies.

Hope over Fear Norma Tevis Matthews, Bill Matthews, 2017-10-06

For those of us who lived through the Cold War years in Dallas, this book is a sometimes painful journey through a past we would most like to forget. For younger people, it fills in gaps in our local history that had national and international dimensions. At the same time, it is a reminder of the integrity, tenacity, and courage of the few brave souls who kept faith in the sure knowledge that right will win out and whose leadership has led us to a new day in our city. Warts and all, this is the story of the Dallas Chapter United Nations Association, long overdue. Norma and Bill Matthews, both of whom are past presidents of DUNA, have done a masterful job of probing the past, ferreting out nuggets of history tucked into boxes and stashed away in family attics, backroom nooks, and office storerooms. For much of the time since its founding in 1953, DUNA has had no permanent home or office, and its records have been at the mercy of whoever was its leader, always with the possibility that succeeding generations of its founders would not recognize the merits of those sealed boxes and would destroy them. Using endless newspaper files, mostly from the Dallas Morning News and some from the late Dallas Times Herald and Fort Worth Star Telegram, the Matthews writing team has been able to follow the founding, development, and leadership of DUNA, vastly enriched by personal stories of individuals who kept the flame alive in good times and bad. Norma and Bill Matthews teamed their professional degrees in education, communication, music, and theology to serve as volunteer activists for human rights and peace endeavors. Married 63 years and retiring as teacher and minister, they committed themselves to research and preserve the history of advocacy for support of sustainable goals of individual and universal dignity and freedom.
