

SOUTHWEST'S FIRST TELEVISION STATION, W5AGQ, GOES ON AIR

All eyes are focused on a small panel of ground glass.

There is a flicker of light—orange and black—and then a face appears.

"This is television station W5AGQ," announces the picture.

And W5AGQ, the Southwest's first television station, goes on the air. Its builder and owner is Truett Kimzey, 2529 Greene Avenue, radio and sound technician, who spent two months building the transmitting station, which was one of the interesting features of the Southwestern Exposition and Fat Stock Show.

Television has been operated over a telephone line in Fort Worth before this, but never before over the air. The principle, explains Kimzey, is much the same as that involved in the process used by radio of picking up sound, turning it into electricity and sending it over the air. The television photographs the subject and turns the picture into electricity.

The performer stands in a darkened room before a battery of 10 photoelectric cells, and dozens of tiny shafts of light are thrown upon his features through a revolving scanning disc. His image is reflected into the photoelectric cells.

On the other end a similar scanning disc revolves at the same rate of speed, and the picture comes back on a ground glass panel.

The performer sings, or talks, into the microphone of another radio station but since electricity has no loss of motion the sound and the picture reach the receivers at the same time and there is perfect synchronization.

At present W5AGQ is a 100-watt amateur station. It will successfully photograph only the head and shoulders of a subject, or of two or more persons standing closely together, but Kimzey is working on developments

which, he hopes, will photograph a larger area.

Kimzey has been working with radio since 1922. He is a member of the Institute of Radio Engineers and has held a federal license since 1927. He is chief engineer for a local commercial radio station.
