- The tagmeme is the correlation of a syntagmatic function (e.g. subject, object) and paradigmatic fillers (e.g. nouns, pronouns or proper nouns as possible fillers of the subject position).

- Tagmemes combine to form a syntagmeme: a syntactic construction, viewed as a sequence of the tagmemes of which it consists.

    <u>Text and Tagmeme</u> Kenneth Lee Pike,Evelyn G. Pike,1983   **Pillars in the History of Biblical Interpretation, Volume 3** Stanley E. Porter,Zachary K. Dawson,2021-06-07 This third volume like its predecessors adds to the growing body of literature concerned with the history of biblical interpretation With eighteen essays on nineteen biblical interpreters volume 3 expands the scope of scholars both traditional and modern covered in this now multivolume series Each chapter provides a biographical sketch of its respective scholar s an overview of their major contributions to the field explanations of their theoretical and methodological approaches to interpretation and evaluations and applications of their methods By focusing on the contexts in which these scholars lived and worked these essays show what defining features qualify these scholars as pillars in the history of biblical interpretation While identifying a scholar as a pillar is somewhat subjective this volume defines a pillar as one who has made a distinctive contribution by using and exemplifying a clear method that has pushed the discipline forward at least within a given context and time period This volume is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the field of biblical studies has developed and how certain interpreters have played a formative role in that development   **English Text** J. R. Martin,1992 Estudio sobre las fuentes del discurso en la ling stica inglesa el sistema y la estructura del texto a trav s de an lisis pr cticos aplicados a tres puntos ling stica educacional cr tica ling stica y ling stica computacional   **Modeling Biblical Language** Stanley E. Porter,Gregory P. Fewster,Christopher D. Land,2016-03-21 Modeling Biblical Language presents articles with some of the latest scholarship applying linguistic theory to the study of the Christian Bible The contributors are all associated with the McMaster Divinity College Linguistic Circle a collegial forum for presenting working papers in modern linguistics especially Systemic Functional Linguistics and biblical studies The papers address a range of topics in linguistic theory and the Hebrew and Greek languages Topics include linguistic model building temporality and verbal aspect Greek lexical semantics and Hebrew Greek translation appraisal and evaluation theory metaphor theory corpus linguistics discourse analysis and Greek clausal structure These various areas of linguistic exploration contribute generally to the interpretation and analysis of the Old and New Testaments as well as to linguistic theory proper   *Thematic Development of English Texts* Mohsen Ghadessy,1995-01-01 This text discusses the concept of theme and its application as an analytical tool to a number of spoken and written registers of English To date studies of text organization have paid less attention to what is called the method of development of a text that is thematic organization The book shows that the study of this organization can reveal many different strategies employed by speakers and writers when texts are created   **A Textlinguistic Analysis of Selected Old Testament Texts in Matthew 1-4** Jeffery L. Capshaw,2004 While providing exciting research opportunities the New Testament s use of the Old Testament continues to create interpretive difficulties Although Matthew s use of the Old Testament generated much scholarly discussion throughout the historical critical period during the contemporary period

specific interest in Matthew s Old Testament usage seemed to decrease Recently however many powerful analytical approaches have come to the fore in biblical studies including various text centered methods such as textlinguistics also known as discourse analysis This book applies one specific type of discourse grammar to several Old Testament citations in Matthew s Gospel This analysis is presented both to initiate discussion and to show how this and similar methods might be utilized to contribute important perspectives on the New Testament s use of the Old Testament *Automatic Summarization* Inderjeet Mani,2001 With the explosion in the quantity of on line text and multimedia information in recent years there has been a renewed interest in automatic summarization This book provides a systematic introduction to the field explaining basic definitions the strategies used by human summarizers and automatic methods that leverage linguistic and statistical knowledge to produce extracts and abstracts Drawing from a wealth of research in artificial intelligence natural language processing and information retrieval the book also includes detailed assessments of evaluation methods and new topics such as multi document and multimedia summarization Previous automatic summarization books have been either collections of specialized papers or else authored books with only a chapter or two devoted to the field as a whole This is the first textbook on the subject developed based on teaching materials used in two one semester courses To further help the student reader the book includes detailed case studies accompanied by end of chapter reviews and an extensive glossary Audience students and researchers as well as information technology managers librarians and anyone else interested in the subject

Patterns of Text Mike Scott,Geoff Thompson,2001-02-27 It is increasingly clear that in order to understand language as a phenomenon we must understand the phenomenon of text Our primary experience of language comes in the form of texts which embody the complete communicative events through which our language using lives are lived These events are shaped by communicative needs and this shaping is reflected in certain characteristic patterns in the texts However the nature of texts and text is still elusive we know which forms are typically found in text but we do not yet have a full grasp of how they constitute its textuality how they make a text tick The twelve contributions to this volume show how texts across a wide range of text types hold together by different patterns of chunking and linking The common purpose in all the contributions is to explore the nature of text patterning as the functional environment within which language operates *Text-Linguistics and Biblical Hebrew* David Allan Dawson,2015-01-29 Modern linguistics is a relative newcomer in the scientific world and text linguistics or discourse analysis is one of its youngest disciplines This fact has inclined many toward scepticism of its value for the Hebraist yet much benefit is thereby overlooked In this work the author examines recent contributions to Hebrew text linguistics by Niccacci Andersen Eskhult Khan and Longacre evaluating them against a twofold standard of theoretical and methodological integrity and clarity of communication An extensive introduction to one particularly promising model of text analysis from Longacre s tagmemic school is given and a step by step methodology is presented Analyses according to this model and methodology are given of seven extended text samples each building on the findings of the

Teilband* Sylvain Auroux,E.F.K. Koerner,Hans-Josef Niederehe,Kees Versteegh,2008-07-14 Volume 2 treats in great detail and at times quite innovatively the individual stages of development of the study of language as an autonomous discipline from the growing awareness in 17th and 18th century Europe of genetic relationships among a host of languages to the establishment of comparative historical Indo European linguistics in the 19th century from the generation of the Schlegels Bopp Rask and Grimm to the Neogrammarians and the application of the comparative method to non Indo European languages from all over the globe Typological linguistic interests first synthesized by Humboldt as well as the development of various other non historical endeavours in the 19th and the first half of the 20th century such as language and psychology semantics phonetics and dialectology receive ample attention **A hierarchical sketch of Mixe as spoken in San José El Paraíso** Julia Dieterman Van Haitsma,Willard Van Haitsma,1976 *Discourse as Structure and Process* Teun A. van Dijk,1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction *Text and Discourse Constitution* János S. Petöfi,2011-05-02 No detailed description available for Text

and Discourse Constitution **Relevance and Linguistic Meaning** Diane Blakemore,2002-09-26 The importance of discourse markers words like so however and well lies in the theoretical questions they raise about the nature of discourse and the relationship between linguistic meaning and context They are regarded as being central to semantics because they raise problems for standard theories of meaning and to pragmatics because they seem to play a role in the way discourse is understood In this new and important study Diane Blakemore argues that attempts to analyse these expressions within standard semantic frameworks raise even more problems while their analysis as expressions that link segments of discourse has led to an unproductive and confusing exercise in classification She concludes that the exercise in classification that has dominated discourse marker research should be replaced by the investigation of the way in which linguistic expressions contribute to the inferential processes involved in utterance understanding **Discourse Particles in Latin** Caroline Kroon,2019-10-01 Due to their extremely elusive nature particles have long been treated in a stepmotherly way in grammars of individual languages as well as in theories of language This study is representative of the recent upsurge of interest in particles more particularly in particles with a discourse marking function By offering a detailed account of a number of Latin discourse particles the study provides more insight into a vitually neglected area of Latin At the same time it contributes to the theoretical and methodological foundations of current particle research and more generally to the development of linguistic models of discourse **Talk Units** Brigitte K. Halford,1996 **Handbook of Middle American Indians, Volume 5** Robert Wauchope,2014-01-07 This volume the fifth in the Handbook of Middle American Indians presents a summary of work accomplished since the Spanish conquest in the contemporary description and historical reconstruction of the indigenous languages and language families of Mexico and Central America The essays include the following Inventory of Descriptive Materials by William Bright Inventory of Classificatory Materials by Maria Teresa Fern ndez de Miranda Lexicostatistic Classification by Morris Swadesh Systemic Comparison and Reconstruction by Robert Longacre and Environmental Correlational Studies by Sarah C Gudschinsky Sketches of Classical Nahuatl by Stanley Newman Classical Yucatec Maya by Norman A McQuown and Classical Quich by Munro S Edmonson provide working tools for tackling the voluminous early postconquest texts in these languages of late preconquest empires Aztec Maya Quich Further sketches of Sierra Popoluca by Benjamin F Elson of Isthmus Zapotec by Velma B Pickett of Huautla de Jim nez Mazatec by Eunice V Pike of Jiliapan Pame by Leonardo Manrique C and of Huamelultec Chontal by Viola Waterhouse together with those of Nahuatl Maya and Quich provide not only descriptive outlines of as many different linguistic structures but also linguistic representatives of seven structurally different families of Middle American languages Miguel L on Portilla presents an outline of the relations between language and the culture of which it is a part and provides examples of some of these relations as revealed by contemporary research in indigenous Middle America The volume editor Norman A McQuown 1914 2005 was Professor of Anthropology at The University of Chicago He formerly taught at Hunter College and served with the Mexican

Department of Indian Affairs He carried out fieldwork with Totonac Huastec Tzeltal Tzotzil Mame and other tribes The Handbook of Middle American Indians was assembled and edited at the Middle American Research Institute of Tulane University with the assistance of grants from the National Science Foundation and under the sponsorship of the National Research Council Committee on Latin American Anthropology
