Goldsmith,1999-08-15 This edition can therefore be regarded as the most important republication of a Mandeville text in the last few decades and should be required reading for anyone seriously concerned to understand the growth of his challenging ideas Professor Irwin Primer in History of Political Thought Volume XXI Issue 4 Mandeville s contributions to The Female Tatler are almost unknown but they are of fundamental importance for understanding The Fable of the Bees and a social theory that was to be of central importance to the Enlightenment s conception of modernity The letters belong to the polemical world of early eighteenth century journalism and have the energy intelligence and gaiety characteristic of Grub Street at its best They deal with many of the subjects which Mandeville was to make his own Unexpectedly and excitedly they also show how closely his thinking about society was bound up with his interest in the position in contemporary society Vintage Mandeville in fact Professor Nicholas Phillipson This book collects for the first time since their original publication the 32 papers which Bernard Mandeville 1670 1733 author of The Fable of the Bees 1st ed 1714 contributed to The Female Tatler 1709 10 one of the many imitators of Richard Steele s Tatler In these papers Mandeville s protagonists the sisters Lucinda and Artesia discuss and debate the origin and basis of human society and its progress honour and courage the value of a life devoted to making money and most importantly the position and the virtues of women The essays are fully annotated providing significant information about Mandeville s sources and identifying historical and literary references The volume also includes a substantive introduction by Maurice Goldsmith a leading expert on Mandeville explaining the relation of the papers to the social thought of the period and the development of Mandeville s views The Female Tatler essays systematically address themes further developed in The Fable of the Bees a work very widely read in the eighteenth century and which was a stimulus to the theories of among others David Hume and Adam Smith The collection will be of interest to scholars of eighteenth century English literature history political and economic thought women s studies and philosophy first publication of these essays since the eighteenth century and the only available edition extended debate on female virtue is an important element in the development of feminism Mandeville s defence of luxury and consumption is significant in the history of the discussion of commercial society and capitalism The Fable of the Bees Bernard Mandeville,1733 *Bernard Mandeville: A Treatise of the Hypochondriack and Hysterick Diseases (1730)* Sylvie Kleiman-Lafon,2017-09-18 This work reflects on hypochondria as well as on the global functioning of the human mind and on the place of the patient physician relationship in

the wider organisation of society First published in 1711 revised and enlarged in 1730 and now edited and published with a critical apparatus for the first time this is a major work in the history of medical literature as well as a complex literary creation Composed of three dialogues between a physician and two of his patients Mandeville's Treatise mirrors the digressive structure of a talking cure Thanks to the soothing and enlightening effects of this casual conversation the physician Mandeville demonstrates the healing power of words for a class of patients that he presents as men of learning who need above all to be addressed in their own language Mandeville's aim was to delineate his own cure for hypochondria and hysteria which consisted of a talking cure followed by diet and exercise but also to discuss the practice of medicine in England and continental Europe at a time when physicians were beginning to lose ground to apothecaries Opposing a purely theoretical approach to medicine Mandeville takes up the principles presented by Francis Bacon Thomas Sydenham and Giorgio Baglivi and advocates a medical practice based on experience and backed up by time tested theories *Bernard de Mandeville's Tropology of Paradoxes* Edmundo Balsemão Pires, Joaquim Braga, 2015-10-05 This book integrates studies on the thought of Bernard de Mandeville and other philosophers and historians of Modern Thought The chapters reflect a rethinking of Mandeville's legacy and together present a comprehensive approach to Mandeville's work The book is published on the occasion of the 300 years that have passed since the publication of the Fable of the Bees Bernard de Mandeville disassembled the dichotomies of traditional moral thinking to show that the outcomes of the social action emerge as new non intentional effects from the combination of moral opposites vice and virtue in such a form that they lose their moral significance The work of this great writer philosopher and physician is interwoven with an awareness of the paradoxical nature of modern society and the challenges that this recognition brings to an adequate perspective on the historical world of modernity **The Individual without Passions** Elena Pulcini, 2012-08-09 The Individual without Passions Modern Individualism and the Loss of the Social Bond offers an innovative look at an extremely timely and important issue individualism from the point of view of a theory of passions This book underlines the importance of the problem of the passions in both forming individual identity and building the social bond Drawing inspiration from classic authors that represent fundamental milestones along the route of modern individualism from Montaigne to Hobbes from Locke to Smith from Rousseau to Tocqueville The Individual without Passions puts forward new hypotheses that contrast with the consolidated views of contemporary reflection both modern and postmodern Elena Pulcini argues that passions are crucial not only when they are strong homo oeconomicus but also when absent or weak homo democraticus in both cases producing pathological effects on the Self and the social bond Finally this book underlines that the image of the modern individual does not end with the egoistical passions and that it is possible to reactivate empathetic and solidaristic passions furthermore it proposes the hypothesis that the solidaristic passions go to fight the egoistical passions This hypothesis seems confirmed and is most evident in the phenomenon of the gift as interpreted by Marcel Mauss and his contemporary heirs the hidden

testimony of a desire for belonging which enables us to propose a new figure of the individual homo reciprocus
