McGrath, Matthew J. Thomas, 2024-09-13 Offers a lively concise and easily accessible approach to the development of Christianity's core themes over the centuries As Christianity enters into a new phase of expansion the study of Christian theology continues to play a key role in modern intellectual culture as well as to those wanting to understand the central issues and preoccupations of the Middle Ages the European Reformation or many other periods in human history Since its initial publication more than 30 years ago Christian Theology An Introduction has established itself as one of the most respected and widely used theological textbooks Now in its seventh edition this classic textbook remains an unparalleled introduction to the primary concepts themes and developments of 2 000 years of Christian thought Designed for students with no prior knowledge of the subject Christian Theology provides an overview of historical theology explains central aspects of philosophical theology describes major debates over Christian theological method and explores key doctrines of systematic theology Theologically neutral chapters offer balanced coverage of Catholic Orthodox Protestant and evangelical traditions positions perspectives and insights In this new edition renowned theologian Alister E McGrath is joined by educationalist Matthew J Thomas to ensure that Christian Theology connects with a range of contemporary teaching contexts Reviewed and improved content is supported by an entirely new series of fifteen lectures on Christian theology written and presented by Professor McGrath Christian Theology An Introduction Seventh Edition remains the ideal textbook for university courses in Christian theology seminary courses across denominations church discussion groups adult Sunday schools and those looking for a reliable guide to the study of Christian thought **Beyond the Modern Age** Bob Goudzwaard, Craig G. Bartholomew, 2017-05-23 Modernity according to Bob Goudzwaard and Craig Bartholomew is not a single ideology but rather a tension between four worldviews In conversation with students from around the world and drawing upon a variety of sources and disciplines the authors propose ways to transcend modernity and address global crises **God and the Self in Hegel** Paolo Diego Bubbio, 2017-06-29 God and the Self in Hegel proposes a reconstruction of Hegel's conception of God and analyzes the significance of this reading for Hegel's idealistic metaphysics Paolo Diego Bubbio argues that in Hegel's view subjectivism the tenet that there is no underlying true reality that exists independently of the activity of the cognitive agent can be avoided and content can be restored to religion only to the extent that God is understood in God's relation to human beings and human beings are understood in their relation to God Focusing on traditional problems in theology and the philosophy of religion such as the ontological argument for the existence of God the Trinity and the death of God Bubbio shows the relevance of Hegel's view of religion and God for his

broader philosophical strategy In this account as a response to the fundamental Kantian challenge of how to conceive the mind world relation without setting mind over and against the world Hegel has found a way of overcoming subjectivism in both philosophy and religion

This book introduces a new data analysis technique that addresses long-standing criticisms of the current standard statistics. Observation Oriented Modelling presents the mathematics and techniques underlying the new method, discussing causality, modelling, and logical hypothesis testing. Examples of how to approach and interpret data using OOM are presented throughout the book, including analysis of several classic studies in psychology. These analyses are conducted using comprehensive software for the Windows operating system. Describes the problems that statistics are meant to answer, why popularly used statistics often fail to fully answer the question, and how OOM overcomes these obstacles.
