Justifying America's Wars Nicholas Kerton-Johnson, 2010-09-13 This book examines the justifications for and practice of war by the US since 1990 and examines four case studies the Gulf War Kosovo Afghanistan and Iraq The author undertakes an examination of presidential speeches and public documents from this period to determine the focal points on which the respective presidents based their rhetoric for war The work then examines the practice of war in the light of these justifications to determine whether changes in justifications correlate with changes in practice In particular the justificatory discourse finds four key themes that emerge in the presidential discourses which are tracked across the case studies and point to the fundamental driving force in US motivations for going to war The four key themes which emerge from the data are international law or norms human rights national interest and egoist morality similar too but wider than exceptionalism This analysis shows that 9 11 resulted in a radical shift away from an international law and human rights focused justificatory discourse to one which was overwhelmingly dominated by egoist morality justifications and national interest This book will be of much interest to students of US foreign policy humanitarian intervention Security Studies and IR theory

*Complex Peace Operations and Civil-Military Relations* Robert Egnell, 2009-05-13 This book explores the impact of different civil military structures on operational effectiveness in complex peace operations Recent operations in Iraq Afghanistan and Somalia are examples of grand failures to enforce peace and to promote democracy and development through international interventions A missing variable in analyses of these conflicts hitherto has been the nature of the civil military interface and its impact The principal argument of this book is that the civil military interface should ideally be integrated within the interagency arena as well as within the defence ministry Such integration has the potential to provide joint civil military planning and comprehensive approaches to operations It also creates mutual trust and understanding amongst officers and civil servants from different departments agencies and units and thereby a co operative interagency culture For the civil military interface to function effectively within the chain of command during operations a co operative culture of trust is essential Crucially structurally and culturally integrated civil military structures are likely to provide a more balanced view of the functional imperative of the armed forces The results are armed forces fit for whatever purpose the political leadership decides for them including complex peace support operations Empirically the book applies the theoretical framework to a comparative study of US and British patterns

of civil military relations their strategic cultures and their operations in Iraq This book will be of much interest to students of peace operations civil military relations humanitarian intervention and security studies IR in general Robert Egnell is a lecturer in War Studies at the Swedish National Defence College and a senior researcher at the Swedish Defence Research Agency He was awarded the 2008 Kenneth N Waltz Dissertation Prize for the best thesis in the field of international security
