

EAGLES

A desert landscape at sunset or sunrise. A long, straight road with a dashed yellow center line and solid white side lines stretches from the bottom center towards the horizon. The sky is filled with large, dramatic clouds in shades of orange, yellow, and brown. In the distance, there are low, dark mountains or mesas. The overall mood is vast and open.

Essential Image Processing and GIS for Remote Sensing Jian Guo Liu, Philippa J. Mason, 2013-04-10 *Essential Image Processing and GIS for Remote Sensing* is an accessible overview of the subject and successfully draws together these three key areas in a balanced and comprehensive manner The book provides an overview of essential techniques and a selection of key case studies in a variety of application areas Key concepts and ideas are introduced in a clear and logical manner and described through the provision of numerous relevant conceptual illustrations Mathematical detail is kept to a minimum and only referred to where necessary for ease of understanding Such concepts are explained through common sense terms rather than in rigorous mathematical detail when explaining image processing and GIS techniques to enable students to grasp the essentials of a notoriously challenging subject area The book is clearly divided into three parts with the first part introducing essential image processing techniques for remote sensing The second part looks at GIS and begins with an overview of the concepts structures and mechanisms by which GIS operates Finally the third part introduces Remote Sensing Applications Throughout the book the relationships between GIS Image Processing and Remote Sensing are clearly identified to ensure that students are able to apply the various techniques that have been covered appropriately The latter chapters use numerous relevant case studies to illustrate various remote sensing image processing and GIS applications in practice

The Essential Guardini Romano Guardini, 1997 Writings of Romano Guardini Includes bibliography and index *The Essential Guide to Image Processing* Alan C. Homological Algebra S.I. Gelfand, Yu.I. Manin, 1994-03-29 This book the first printing of which was published as volume 38 of the Encyclopaedia of Mathematical Sciences presents a modern approach to homological algebra based on the systematic use of the terminology and ideas of derived categories and derived functors The book contains applications of homological algebra to the theory of sheaves on topological spaces to Hodge theory and to the theory of modules over rings of algebraic differential operators algebraic D modules The authors Gelfand and Manin explain all the main ideas of the theory of derived categories Both authors are well known researchers and the second Manin is famous for his work in algebraic geometry and mathematical physics The book is an excellent reference for graduate students and researchers in mathematics and also for physicists who use methods from algebraic geometry and algebraic topology

The Essential Herman Kahn Paul Dragos Aligica, Kenneth R. Weinstein, 2009-06-16 By the time of his untimely death in 1983 Herman Kahn was recognized by both friends and intellectual adversaries as one of the world s most creative and best minds The current growing resurgence of interest in Kahn s ideas and intellectual legacy demonstrates the enduring relevance of his work Yet in spite of the constant influence of his arguments there is a shortage of books summarizing Kahn s essential contributions and thus his work is not as well known as it should be The Essential Herman Kahn is an attempt to cope with this predicament and offer the public for the first time an anthology consisting of the essence of Kahn s work organized thematically The two decades that have passed since his death allow us today to approach his work undisturbed by the sound and fury of the many public debates and controversies he participated in and to focus on some of the deepest and most enduring dimensions of his intellectual contributions The anthology will try to bring together out of the several thousands pages published by Kahn during his life the essential Kahn the most relevant consequential and interesting themes ideas and arguments defining his legacy As such it will met the needs of those who are interested in Kahn s work but do not have the time and energy to access his out of print books to make their way through the voluminous number of pages and then to sort out the essential from the accidental the perennial from the contextual

Higher Orbifolds and Deligne-Mumford Stacks as Structured Infinity-Topoi David Carchedi,2020 The author develops a universal framework to study smooth higher orbifolds on the one hand and higher Deligne Mumford stacks as well as their derived and spectral variants on the other and use this framework to obtain a

completely categorical description of which stacks arise as the functor of points of such objects He chooses to model higher orbifolds and Deligne Mumford stacks as infinity topoi equipped with a structure sheaf thus naturally generalizing the work of Lurie but his approach applies not only to different settings of algebraic geometry such as classical algebraic geometry derived algebraic geometry and the algebraic geometry of commutative ring spectra but also to differential topology complex geometry the theory of supermanifolds derived manifolds etc where it produces a theory of higher generalized orbifolds appropriate for these settings This universal framework yields new insights into the general theory of Deligne Mumford stacks and orbifolds including a representability criterion which gives a categorical characterization of such generalized Deligne Mumford stacks This specializes to a new categorical description of classical Deligne Mumford stacks which extends to derived and spectral Deligne Mumford stacks as well *A Discourse of the Freedom of the Will* Peter Sterry,1675
