Two Ways of Light: Kabbalah and Vedanta James N. Judd Ms.D. D.D.,2000-10-18 There is an unique relationship that exists between the Jewish mystical teachings of Kabbalah and the highest spiritual philosophy of the Hindus the Vedanta Outwardly they appear to be vastly different but study them analyze them come to understand what they are really saying and the similarities become obvious And such a study is not just an academic exercise for it will be found that these ancient teachings not only augment each other in providing answers to the questions of life but they also contain some very practical advice that can bring a greater measure of harmony in the conducting of our daily affairs Kabbalah and Vedanta can be called unique as The dedicated proponents of each one hold that theirs is the earliest spiritual teaching in the world Neither teaching owes its origin to any single person Neither can be called a separate religion in the sense of having its own set of man made creeds and dogmas The profundity of their wisdom can be considered as equal In this book *Two Ways of Light* Dr Judd devotes the first two chapters in examining the six principles common to all kabbalistic schools of thought and the three essential points of Vedanta The third chapter shows the intrinsic harmony that exists between Kabbalah and Vedanta by comparing the six principles with the three points And the fourth chapter illustrates the practical value of both teachings through commentaries on kabbalistic verses that compare to the individual verses of a Vedantic scripture the Isha Upanishad Finally in the fifth chapter will be found not only the reasons for the basic harmony that exists between these two ancient spiritual philosophies and the major world religions but also the relevance they have for us today This book will be of interest for 1 Those who wish to have a greater understanding of Kabbalah and or Vedanta and 2 Those who are looking for greater spiritual meaning in their lives

Allison P. Coudert,2023-08-14 If he had lived among the Greeks he would now be numbered among the stars So wrote Gottfried Wilhelm Leibniz in his epitaph for Francis Mercury van Helmont Leibniz was not the only contemporary to admire and respect van Helmont but although famous in his own day he has been virtually ignored by modern historians Yet his views influenced Leibniz contributed to the development of modern science and fostered the kind of ecumenicalism that made the concept of toleration conceivable The progressive nature of van Helmont's thought was based on his deep commitment to the esoteric doctrines of the Lurianic Kabbalah With his friend Christian Knorr von Rosenroth van Helmont

edited the Kabbala Denudata 1677 1684 the largest collection of Lurianic Kabbalistic texts available to Christians up to that time Because the subject matter of this work appears so difficult and arcane it has never been appreciated as a significant text for understanding the emergence of modern thought However one can find in it the basis for the faith in science the belief in progress and the pluralism characteristic of later western thought The Lurianic Kabbalah thus deserves a place it has never received in histories of western scientific and cultural developments Although van Helmont s efforts contributed to the development of religious toleration his experience as a prisoner of the Inquisition accused of Judaising reveals the problematic relations between Christians and Jews during the early modern period New Inquisitional documents relating to van Helmont s imprisonment will be discussed to illustrate the difficulties faced by anyone advocating philo semitism and toleration at the time
