Small Really Is Beautiful:

Small States and International Law British Institute of International and Comparative Law, 2025-08-28 International law can serve as both a sword and a shield for small States including in the realisation of their rights on the international plane While it can offer a mode of protection to small States and provide opportunities to engage with issues of global concern international law also presents challenges and difficulties for small States in some contexts The chapters in this edited volume explore small States many and diverse interactions with international law in numerous contexts and fora and across a range of thematic areas and issues including climate change disarmament technological development and human rights amongst many others Democracy in Small States Jack Corbett, Wouter Veenendaal, 2018-09-19 Populism and the personalization of politics appears to be threatening the existence of democracy as we know it all over the world It is now more important than ever to understand the history of this form of regime why it has thrives and fails But existing studies are limited by their focus on a few large and predominately rich states This book takes the opposite approach it investigates how politics is practiced in the smallest states where hyper personalization has always been a ubiquitous feature of political life It optimistically finds that hyper personalized democracy can actually persist against all odds but also cautions that political practices in small states are often markedly different to larger states *Oxford Studies in Democratization* is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford Are Small Firms Important? Their Role and Impact Stephen Ackermann, 2012-12-06 Are Small Firms Important Their Role and Impact proposes and supports the claim that small firms make two indispensable contributions to the economy First they are an integral part of the renewal process that pervades market economies New and small firms play a crucial role in experimentation and innovation that leads to technological change productivity and economic growth Second small firms are the essential mechanism by which millions enter the economic and social mainstream of American society The public policy implications for sustained economic growth and social well being is the continued high level creation of new and small firms by all segments of society It should be the role of government policy to facilitate that process by eliminating entry barriers lowering transaction costs and minimizing regulation **Failure or Reform?** Stewart Lockie, 2019-09-10 Market reform promises more environmental protection and more profitable agriculture at lower financial cost Too good to be true This book examines numerous empirical examples of policy in action to identify principles for the successful application of market based policy instruments Where some market instruments are used to fix market failures by putting a value on environmental protection others use market like mechanisms to allocate financial incentives for environmental work They are promoted as

flexible efficient and politically neutral solutions to the competing demands of social economic and ecological sustainability But they also attract criticism for rolling back environmental regulation and privatizing public goods This book argues that while many market based instruments have merit decisions about responsibility cannot be left entirely to the market Whichever instruments we use decision making needs to be embedded in a logic of democratization Using case studies from around the world this book investigates how instruments like eco standards payments for ecosystem services pollution trading and community based natural resource management perform in practice and what can be learned about applying them more effectively While the approach is primarily sociological it is deliberately written to bridge the gap between sociology economics environmental sciences and the concerns of environmental policy makers Key Topics in

Conservation Biology 2 David W. Macdonald, Katherine J. Willis, 2013-02-06 Following the much acclaimed success of the first volume of Key Topics in Conservation Biology this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology Written by an internationally renowned team of authors Key Topics in Conservation Biology 2 adds to the still topical foundations laid in the first volume published in 2007 by exploring a further 25 cutting edge issues in modern biodiversity conservation including controversial subjects such as setting conservation priorities balancing the focus on species and ecosystems and financial mechanisms to value biodiversity and pay for its conservation Other chapters setting the framework for conservation address the sociology and philosophy of peoples relation with Nature and its impact on health and such challenging practical issues as wildlife trade and conflict between people and carnivores As a new development this second volume of Key Topics includes chapters on major ecosystems such as forests islands and both fresh and marine waters along with case studies of the conservation of major taxa plants butterflies birds and mammals A further selection of topics consider how to safeguard the future through monitoring reserve planning corridors and connectivity together with approaches to reintroduction and re wilding along with managing wildlife disease A final chapter by the editors synthesises thinking on the relationship between biodiversity conservation and human development Each topic is explored by a team of top international experts assembled to bring their own cross cutting knowledge to a penetrating synthesis of the issues from both theoretical and practical perspectives The interdisciplinary nature of biodiversity conservation is reflected throughout the book Each essay examines the fundamental principles of the topic the methodologies involved and crucially the human dimension In this way Key Topics in Conservation Biology 2 like its sister volume Key Topics in Conservation Biology embraces issues from cutting edge ecological science to policy environmental economics governance ethics and the practical issues of implementation Key Topics in Conservation Biology 2 will like its sister volume be a valuable resource in universities and colleges government departments and conservation agencies It is aimed particularly at senior undergraduate and graduate students in conservation biology and wildlife management and wider ecological and environmental subjects and those taking Masters degrees in any field relevant to conservation and the environment Conservation practitioners policy

makers and the wider general public eager to understand more about important environmental issues will also find this book invaluable Year Book Australia 1994 Australian Bureau of Statistics,1993 *Reconsidering Localism* Simin Davoudi,Ali Madanipour,2015-01-09 Localism has been deployed in recent debates over planning law as an anodyne grassroots way to shape communities into sustainable human scale neighborhoods But local is a moving category with contradictory nuanced dimensions *Reconsidering Localism* brings together new scholarship from leading academics in Europe and North America to develop a theoretically grounded critique and definition of the new localism and how it has come to shape urban governance and urban planning Moving beyond the UK this book examines localism and similar shifts in planning policy throughout Europe and features essays on localism and place making sustainability social cohesion and citizen participation in community institutions It explores how debates over localism and citizen control play out at the neighborhood institutional and city level and has come to effect the urban landscape throughout Europe *Reconsidering Localism* is a current vital addition to planning scholarship *Comparative Politics* Howard J. Wiarda,2006-12-28 Beginning with an introduction to the field of comparative politics this clear and complete text moves on to explore new innovative directions in the field Leading scholar Howard J Wiarda explores its main approaches including political development political culture dependency theory corporatism indigenous theories of change state society relations rational choice and the new institutionalism Wiarda addresses many hot issues in the field Can democracy and human rights be transplanted from one culture to another Is civil society exportable What works in the effort to develop the poorer nations and what doesn t Where are we headed with such frontier research issues as comparative environmental policy women s rights and gay rights The book concludes with a stimulating discussion of whether the great systems debates of the past socialism vs capitalism democracy vs authoritarianism are now over and points to some of the next important study and research frontiers Students professors and general readers will all find *Comparative Politics* current provocative and well written a truly balanced overview

Adaptive Capacity and Environmental Governance Derek Armitage,Ryan Plummer,2014-07-08 Rapid environmental change calls for individuals and societies with an ability to transform our interactions with each other and the ecosystems upon which we depend Adaptive capacity the ability of a social ecological system or the components of that system to be robust to disturbances and capable of responding to changes is increasingly recognized as a critical attribute of multi level environmental governance This unique volume offers the first interdisciplinary and integrative perspective on an emerging area of applied scholarship with contributions from internationally recognized researchers and practitioners It demonstrates how adaptive capacity makes environmental governance possible in complex social ecological systems Cutting edge theoretical developments are explored and empirical case studies offered from a wide range of geographic settings and natural resource contexts such as water climate fisheries and forestry Of interest to researchers policymakers and resource managers seeking to navigate and understand social ecological change in diverse geographic settings and resource contexts

Popular Science ,1927-10 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better Enabling legal frameworks for sustainable land-use investments in Tanzania: Legal assessment report Robert Kibugi,D. Andrew Wardell,Marie-Claire Cordonier Segger,Caroline Haywood,Renée Gift,2015-10-08 The International Development Law Organization IDLO and the Center for International Forestry Research CIFOR assessed the legal frameworks that govern land use activities and investments in Tanzania The policy institutional and legal frameworks are well developed although implementation and enforcement remains weak due to ambiguities in the law and a general lack of supportive incentives This Legal Assessment report for Tanzania examines four key challenges to the attainment of sustainable land use investments These comprise Enforcement of environmental and social safeguards Tanzania has made progress in implementing the Environmental Management Act by ensuring greater compliance with the Environmental Impact Assessment regulations although exceptions exist in the construction sector and mining legislation that often enables the government to circumvent important land tenure safeguards Incentives for sustainable investments in the legal framework A lack of incentives exists despite the creation of the Tanzania Investment Centre the adoption of an Investment Guide in 2013 and the incorporation of sustainability considerations into laws and policies governing investments in the agriculture energy and forestry and mining sectors Land tenure security Tanzania s land law framework now includes formal recognition of customary title and the reservation of land under the category of village land exclusively for Tanzanians although improvements are still needed in terms of processes of consultation and compensation Public awareness and lack of access to information Awareness of natural resources and investment policies legislation and regulations is generally low amongst rural communities as well as Ward executive officers village leaders and village land committee members Rural radio represents their most important source of information **Beyond Proprietorship** Billy B. Mukamuri,J. M. Manjengwa,Simon Anstey,2008-12-31 Discusses strategies of conservation of natural resources particularly wildlife Focuses on the participation of marginalised people living in poor and remote regions of Zimbabwe Includes discussions about the policy implications of regional tenure regimes and the place of local resources management in global conservation politics **Beyond Ujamaa in Tanzania** Goran Hyden,2023-11-10 Beyond Ujamaa in Tanzania Underdevelopment and an Uncaptured Peasantry explores the challenges of development and underdevelopment in Africa with a focus on Tanzania s experience during its early socialist years The book critiques the dominant ideologies of development whether capitalist or socialist as being rooted in Western industrial paradigms that often fail to address the realities of pre capitalist African societies It argues that the underdevelopment in Africa is not solely due to excessive penetration by global capitalism but also to capitalism s inability to dismantle the resilient pre capitalist structures in many rural societies The author highlights the role of the Tanzanian peasantry whose economic and social autonomy often resists

the centralizing tendencies of modern development presenting them not as mere appendages to the global economy but as key players with their own modes of production and unique societal structures The book is grounded in over a decade of fieldwork and engagement with rural Tanzanian communities enriched by the author's fluency in Swahili and deep involvement in local life It argues for a more nuanced approach to studying African societies one that goes beyond Western assumptions and models By placing the peasant mode of production at the center of analysis the study challenges conventional wisdom and suggests that the primary development challenge in Africa lies not with multinational corporations but with understanding and working within the dynamics of the smallholder peasant economy The author also reflects on the limitations of conventional social science research and calls for greater involvement in the lived realities of the communities studied emphasizing the need for research methods that are sensitive to local contexts and values The book combines academic critique field observations and a focus on the epistemological biases of Western scholarship to present a compelling argument for rethinking development in Africa This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980

Energy Abstracts for Policy Analysis, 1980-07 Varieties of Clientelism Edward Aspinall, Ward Berenschot, 2022-12-26 Clientelism is a prominent feature of many of the world's democracies and electoral authoritarian regimes Yet the comparative study of this practice which involves exchanging personal favours for electoral support remains strikingly underdeveloped This book makes the case that clientelistic politics take different forms in different countries and that this variation matters for understanding democracy elections and governance Involving collaboration by experienced observers of politics in several countries Mexico Ghana Sudan to Turkey Indonesia the Philippines Caribbean and Pacific Island states and Malaysia the chapters in this volume unpack the concept of clientelism and show that it is possible to identify different types of patronage democracies The book proposes a comparative framework that focuses on the networks that politicians use the type of resources they hand out their degree of control over the distribution of state resources and shows that the comparative study of a key informal dimension of politics offers much analytical promise for scholars of democracy and governance Varieties of Clientelism is essential reading for scholars and students interested in clientelism patronage democracies comparative political economy as well as party politics The chapters in this book were originally published as a special issue of Democratization **Report**, 1977 The Political Marketing Revolution Jennifer Lees-Marshment, 2004-10 This book shows how British politics is being transformed from a leadership run system to one dictated by public needs and demands No longer confined to party politics organizations including the monarchy the BBC universities local councils charities and the Scottish Parliament are adopting the tools of market intelligence to understand their market needs and demands The political

marketing revolution raises many questions such as whether the student or patient really does know best and can decide his own education and health care The book calls for a debate about the movement of the British political system towards a market orientation and a re negotiation of the relationship between leaders and the market While recognizing the need for political leaders to listen this debate places some responsibilities on the political consumer looking to create a new relationship that might work more effectively for both sides The Best Value Colleges 2012 Princeton Review,2012-02-07 Looks at one hundred fifty colleges and universities across the country half public and half private that provide superb academic studies top notch facilities and other excellent features for a lot less money than the other schools *The Best Value Colleges 2013* Robert Franek,Laura Braswell,Princeton Review,David Soto,2013-02-05 Looks at one hundred fifty colleges and universities across the country that provide superb academic studies top notch facilities and other excellent features for a lot less money than the other schools Co-designing Infrastructures Sarah Bell,Charlotte Johnson,Kat Austen,Gemma Moore,Tse-Hui Teh,2023 Co designing Infrastructures tells the story of a research programme designed to bring the power of engineering and technology into the hands of grassroots community groups to create bottom up solutions to global crises Four projects in London are described in detail exemplifying community collaboration with engineers designers and scientists to enact urban change The projects co designed solutions to air pollution housing the water energy food nexus and water management Rich case study accounts are underpinned by theories of participation environmental politics and socio technical systems The projects at the heart of the book are grounded in specific settings facing challenges familiar to urban communities throughout the world This place based approach to infrastructure is of international relevance as a foundation for urban resilience and sustainability The authors document the tools used to deliver this work providing guidance for others who are working to deliver local technical solutions to complex social and environmental problems around the world This is a book for engineers designers community organisers and researchers Co authored by researchers it includes voices of community collaborators their experiences frustrations and aspirations It explores useful theories about infrastructure engineering and resilience from international academic research and situates it in community based co design experience to explain why bottom up approaches are needed and how they might succeed
