**Life after Stress** M. Shaffer, 2012-12-06 STRESS STYLES It is late afternoon on the last Friday of the month At the bank the lines of customers waiting to deposit their paychecks or to withdraw money for the weekend have stretched practically to the front doors At one window a customer finishes and the next person a merchant steps up He opens a cloth bag and produces a stack of checks cash and deposit slips almost two inches thick The teller's eyes widen This will be at least ten minutes work maybe fifteen What about those other customers waiting in line How will they react Interestingly enough the reactions of the customers waiting in line behind the merchant vary considerably Gary Johnson for instance is furious He grinds his cigarette under his heel and mutters about inconsiderate jerks who wait until the last minute to deposit their week's receipts Gary shifts back

and forth from foot to foot the swaying of his body telegraphing his frustration He probes his pockets to see whether any of his antacid mints are left Finding none he curses under his breath and lights another cigarette

**Exercised** Daniel Lieberman, 2021-01-05 If exercise is healthy so good for you why do many people dislike or avoid it These engaging stories and explanations will revolutionize the way you think about exercising not to mention sitting sleeping sprinting weight lifting playing fighting walking jogging and even dancing Strikes a perfect balance of scholarship wit and enthusiasm Bill Bryson New York Times best selling author of *The Body* If we are born to walk and run why do most of us take it easy whenever possible Does running ruin your knees Should we do weights cardio or high intensity training Is sitting really the new smoking Can you lose weight by walking And how do we make sense of the conflicting anxiety inducing information about rest physical activity and exercise with which we are bombarded In this myth busting book Daniel Lieberman professor of human evolutionary biology at Harvard University and a pioneering researcher on the evolution of human physical activity tells the story of how we never evolved to exercise to do voluntary physical activity for the sake of health Using his own research and experiences throughout the world Lieberman recounts without jargon how and why humans evolved to walk run dig and do other necessary and rewarding physical activities while avoiding needless exertion Exercised is entertaining and enlightening but also constructive As our increasingly sedentary lifestyles have contributed to skyrocketing rates of obesity and diseases such as diabetes Lieberman audaciously argues that to become more active we need to do more than medicalize and commodify exercise Drawing on insights from evolutionary biology and anthropology Lieberman suggests how we can make exercise more enjoyable rather than shaming and blaming people for avoiding it He also tackles the question of whether you can exercise too much even as he explains why exercise can reduce our vulnerability to the diseases mostly likely to make us sick and kill us
