Russia's Economic Transitions Nicolas Spulber,2003-04-10 Russia s Economic Transitions examines the three major transformations that the country underwent from the early 1860s to 2000 The first transition under Tsarism involved the partial break up of the feudal framework of land ownership and the move toward capitalist relations The second following the Communist revolution of 1917 brought to power a system of state ownership and administration a sui generis type of war economy state capitalism subjecting the economy s development to central commands The third started in the early 1990s and still unfolding is aiming at reshaping the inherited economic fabric on the basis of private ownership The three transitions originated within different settings but with a similar primary goal namely the changing of the economy s ownership pattern in the hopes of providing a better basis for subsequent development The treatment s originality impartiality and historical breadth have cogent economic social and political relevance **Challenges To Entrepreneurs** Dr G.Tamizharasi Dr N.Panchanatham, *Africa: Facing Human Security Challenges in the 21st Century* Mentan,

Tatah, 2014-05-12 Africa's dynamic security environment is characterized by great diversity from conventional challenges such as insurgencies, resource and identity conflicts and post conflict stabilization to growing threats from piracy, narcotics trafficking, violent extremism and organized crime taking root in urban slums among others. This precarious environment jeopardizes security at the societal, community and individual levels. In a globalized and interconnected world, millions of people worldwide are affected by some form of human insecurity. Infectious and parasitic diseases annually kill millions. Internally displaced persons number millions, including 5 million in Sudan alone. In Zambia, 1 million people in a population of 11 million are reported to be HIV positive, a situation much worse than in other countries. Potable water crisis looms almost everywhere. In this book, Tatah Mentan points out the need to shift the focus away from a state-centric and military strategic emphasis on security to an interdisciplinary and people-centric approach that embraces notions like global citizenship, empowerment and participation. The primary elements of economic, food, health, environment, personal, community and political security all comprise the broader understanding of human security in an intricately interconnected world.
