Tibetan Logic Katherine Rogers, 2009-03-16 Within Tibetan Buddhism has arisen a system of education and a curriculum designed to enable the student to develop a path of reasoning a consciousness trained in reasoned analysis until capable of understanding first the meaning of religious texts and eventually the true nature of reality An important aspect of Tibetan logic is that it is used to develop new and valid knowledge about oneself and the world Included here is a translation of a text by Pur bu jok the Thirteenth Dalai Lama s philosophy tutor on the topic of Signs and Reasonings a manual introducing beginners to the principles vocabulary and concepts of the system of logic The purpose of Pur bu jok s text is to lay a foundation for understanding how valid cognition is acquired What is validity How is valid knowledge acquired What can be known Further what knowledge can be acquired through reasoning that will lead one to spiritual development and even to buddhahood Katherine Rogers has enriched the translation with commentary by several eminent scholars of the Ge luk pa order revealing a marvelous path that draws one into the heart of the Tibetan approach to knowledge and self transformation It is fundamental to Tibetan thought that true knowledge is practical useful and ultimately transforming and liberating Such knowledge is far from obvious but it can be attained through correct reasoning Thus logic is an important tool a part of the spiritual path leading ultimately to complete self transformation

Science and Philosophy in the Indian Buddhist Classics, Vol. 3 Dalai Lama XIV Bstan-'dzin-rgya-mtsho, Dalai Lama, Thupten Jinpa, 2022-12-13 Deepen your understanding of meaning and truth with the third volume of the Dalai Lama s esteemed series *Science and Philosophy in the Indian Buddhist Classics* In this third volume the focus turns to exploring the philosophical schools of India The practice of presenting the views of various schools of philosophy dates back to the first millennium in India when proponents of competing traditions would arrange the diverse sets of philosophical positions in a hierarchy culminating in their own school s superior tenets Centuries later relying on the Indian Buddhist treatises Tibet developed its own tradition of works on tenets grub mtha often centered on the four schools of Buddhist philosophy using them to demonstrate the philosophical evolution within their own tradition and within individual practitioners as they progressed through increasingly more subtle expressions of the true reality The present work follows in this venerable

tradition but with a modern twist Like its predecessors it presents the views of seven non Buddhist schools those of the Samkhya Vaishesika Nyaya Mimamsa Vedanta Jaina and Lokayata followed by the Buddhist Vaibhasika Sautrantika Cittamatra and Madhyamaka schools arranging them like steps on a ladder to the profound But rather than following in the sharply polemical approach of its ancient predecessors it strives to survey each tradition authentically relying on and citing the texts sacred to each allowing the different traditions to speak for themselves What it asks are the basic components of the world we experience What is the nature of their ultimate reality And how can we come to experience that for ourselves See how the rich spiritual traditions of India approached these key questions where they agreed and how they evolved through dialogue and debate Provided by publisher *The Desert Rider* L. P. Unknown Country provides the reader with a harrowing and riveting account of a 19th century expedition through the northern mountain ranges of western Canada. In the winter of 1874-75, Edward Worrell Jarvis (1846-1894) and Charles Francis Hanington (1848-1930) took part in an expedition on behalf of the Canadian Pacific Survey from Quesnel, British Columbia to Winnipeg, Manitoba. It led them over the northern Rocky Mountains through what would come to be known as Jarvis Pass, Kakwa Provincial Park, British Columbia, and eventually onto the Canadian plains. The trip took them 116 days and covered over 3000 kilometres, of which almost 1500 was travelled on snowshoes. Through *An Unknown Country* brings together the day to day reports of Jarvis and the more entertaining narrative of the epic journey by Hanington into a single volume for the first time. Recounting harrowing treks through deep mountains, densely forested valleys, open foothills, and wide prairie, this highly readable adventure story can most certainly be read alongside the better known journals of Alexander Mackenzie, Simon Fraser, David Thompson, and Paul Kane. *Report of Progress on the Explorations and Surveys Up to January, 1874* Sandford Fleming, 1874. The second volume in a prominent new series on Buddhism and science, directed by the Dalai Lama and previously covered by the BBC, *Science and Philosophy in the Indian Buddhist Classics* compiles classical Buddhist explorations of the nature of our material world, the human mind, logic, and phenomenology, and puts them into context for the modern reader. This ambitious four-volume series, a major resource for the history of ideas and especially the history of science and philosophy, has been conceived by and compiled under the visionary supervision of His Holiness the Dalai Lama himself. It is his view that the exploratory thinking of great Indian masters in the first millennium CE still has much that is of interest to us today, whether we are Buddhist or not. These volumes make those insights accessible. This, the second volume in the series, focuses on the science of the mind. Readers are first introduced to Buddhist conceptions of mind and consciousness and then led through traditional presentations of mental phenomena to

reveal a Buddhist vision of the inner world with fascinating implications for the contemporary disciplines of cognitive science psychology emotion research and philosophy of mind Major topics include The distinction between sensory and conceptual processes and the pan Indian notion of mental consciousness Mental factors specific mental states such as attention mindfulness and compassion and how they relate to one another The unique tantric theory of subtle levels of consciousness their connection to the subtle energies or winds that flow through channels in the human body and what happens to each when the body and mind dissolve at the time of death The seven types of mental states and how they impact the process of perception Styles of reasoning which Buddhists understand as a valid avenue for acquiring sound knowledge In the final section the volume offers what might be called Buddhist contemplative science a presentation of the classical Buddhist understanding of the psychology behind meditation and other forms of mental training To present these specific ideas and their rationale the volume weaves together passages from the works of great Buddhist thinkers like Asanga Vasubandhu Nagarjuna Dignaga and Dharmakirti His Holiness the Dalai Lama s introduction outlines scientific and philosophical thinking in the history of the Buddhist tradition To provide additional context for Western readers each of the six major topics is introduced with an essay by John D Dunne distinguished professor of Buddhist philosophy and contemplative practice at the University of Wisconsin These essays connect the traditional material to contemporary debates and Western parallels and provide helpful suggestions for further reading
