Sir Aurel Stein Helen Wang, British Museum, 2004 Sir Aurel Stein was an archaeological explorer famous for his fieldwork in China India and the Middle East The papers by international scholars in this volume throw new light on Stein's life and work

Uygur Patronage in Dunhuang Lilla Russell-Smith, 2021-11-29 This volume is about the long neglected but decisive influence of Uygur patrons on Dunhuang art in the tenth and eleventh centuries Through an insightful introduction to the hitherto little known early history and art of the Uygurs the author explains the social and political forces that shaped the taste of Uygur patrons The cultural and political effects of Sino Uygur political marriages are examined in the larger context of the role of high ranking women in medieval art patronage Careful study of the iconography technique and style sheds new light on important paintings in the collection of the British Museum in London and the Musée national des Arts asiatiques Guimet in Paris and through comparative analysis the importance of regional art centres in medieval China and Central Asia is explored Richly illustrated with line drawings as well as colour and black and white plates

The Compensations of Plunder Justin M. Jacobs, 2020-07-13 A very important contribution to the history of collecting in the new context of nationalism in China and in the West innovative and engaging American Historical Review From the 1790s until World War I Western museums filled their shelves with art and antiquities from around the world These objects are now widely regarded as stolen from their countries of origin and demands for their repatriation grow louder by the day In *The Compensations of Plunder* Justin M Jacobs brings to light the historical context of the exodus of cultural treasures from northwestern China Based on a close analysis of previously neglected archives in English French and Chinese Jacobs finds that many local elites in China acquiesced to the removal of art and antiquities abroad understanding their trade as currency for a cosmopolitan elite In the decades after the 1911 Revolution however these antiquities went from being diplomatic capital to disputed icons of the emerging nation state A new generation of Chinese scholars began to criminalize the prior activities of archaeologists erasing all memory of the pragmatic barter relationship that once existed in China Recovering the voices of those local officials scholars and laborers who shaped the global trade in antiquities *The Compensations of Plunder*

brings historical grounding to a highly contentious topic in modern Chinese history and informs heated debates over cultural restitution throughout the world Clearly the result of a very meticulously researched project *The Compensations of Plunder* is a well crafted and tremendously enjoyable read P r Cassel University of Michigan *After Alexander* Joe Cribb, Georgina Herrmann, 2007-07-26 This new study of the history and archaeology of Central Asia is crucial for our understanding of the ancient and early medieval world The period from the conquests of Alexander the Great to the arrival of Islam was one of change and conflict between settled peoples and new arrivals city dwellers and nomads *Trade, Commerce, and the State in the Roman World* Andrew Wilson, Alan K. Money on the Silk Road Helen Wang, 2004 This book focuses on the money of Eastern Central Asia to c AD 800 a period of over 900 years across a vast geographical area with a very diverse population of different cultures and traditions The only relevant historical accounts are those found in the Chinese dynastic histories yet these contain few references to money in Eastern Central Asia This study therefore depends almost entirely on the archaeological evidence for money found at sites in the region in the form of coins and contemporary documentary evidence The book is arranged in four parts The first part presents the background to the study the second the numismatic evidence the third gives the evidence for money in the contemporary documents excavated at sites in Eastern Central Asia and the concluding part brings together the data from the numismatic and documentary evidence to create a new framework for money in early Eastern Central Asia The
