*The State of the European Union*, 6 Tanja A. Börzel,Rachel A. Cichowski,2005-08-04 Law Politics and Society is the sixth and latest addition to the European Union Studies Association series State of the European Union The contributors of this volume take the dynamic interaction between law politics and society as a starting point to think critically about recent developments and future innovations in European integration and EU studies The book provides an overview of key events between 2000 and 2002 in the European Union while illuminating how these institutional formal legal developments impact ordinary individuals and EU politics For example the European Convention with the possibility of an EU constitution is viewed not only as a new institutional development but we examine what impact the creation of judicially enforceable rights has for Europeans and European integration How does the opportunity for new rights claims alter the balance of power between individuals and EU organizations such as the European Court of Justice vis vis national governments in EU policy expansion Importantly the volume also seeks to provide a unique and interdisciplinary approach to studying the European Union by bringing together both legal scholars and political scientists Chapter contributors offer readers both sophisticated theoretical and empirical accounts of these new

developments Issues such as enlargement immigration reform and monetary union require not only a precise understanding of an increasingly complex set of formal legal rules the domain of legal scholars but equally important are the effects on ordinary citizens and political participation the very power struggles that concern political scientists This volume seeks to integrate these two approaches not only by including the scholarship in a single volume but by asking individual contributors to think outside their respective disciplines The division between the legal and political as many would argue is often both artificial and unproductive Our volume seeks to bridge this divide **Global Political Economy** Theodore H.

important scholarly perspectives in the form of both journal article reprints and original contributions on the structure and dynamics of the EU's multi-layered relations with its Eastern neighbours within the Eastern Partnership EaP framework and beyond. In May 2019 the EU's EaP, an ambitious and sophisticated policy framework conjoining elements of cooperation and integration with the EU's six eastern neighbours – i.e. Ukraine, Belarus, Moldova, Georgia, Armenia, and Azerbaijan – turned ten years. This anniversary, in conjunction with repeatedly voiced critique by scholars and policy makers alike regarding the framework's effectiveness and utility, led the EU to submit the EaP to a fundamental auditing and revision. Structured around both enduring and emerging issues in the broader EU Eastern neighbourhood framework, this book provides a retrospective analysis of key structural and relational challenges, unfolding regional dynamics, distinctive forms of bilateral/multilateral engagement, whilst also offering a critical perspective on the contested future relations between the EU and its Eastern neighbours. Looking backwards and providing a critical and thorough assessment of the first ten years of the EaP in practice, this book thinks forward and gauges its many potential future avenues. This comes at a crucial moment as the EU and its six Eastern neighbours are in search of new and mutually acceptable forms of association.

The Core-Periphery Divide in the European Union Rudy Weissenbacher, 2020-01-29. This book revisits the forgotten history of the European Dependency School in the 1970s and 1980s, explores core-periphery relations in the European integration process, and the crises of the contemporary European Union from a dependency perspective, and draws lessons for alternative development paths. Was disintegration of the European Union foretold? With the benefit of hindsight, the critical analysis of the European integration process by researchers from the European Dependency School is most timely. The current framework of the

European Union seems to be haunted by issues that had been very familiar to the researchers of the European Dependency School such as a lack of a common and balanced industrial policy How do the situations compare What lessons can be learnt for alternative development policies in contemporary Europe Weissenbacher tackles these issues which are of relevance to all interested in political economy political science development studies and regional development **Library of Congress Catalogs** Library of Congress,1976 The Social Construction of Corruption in Europe Dirk Tänzler,Konstadinos Maras,2016-02-24 The volume demonstrates the suitability of the theory of social constructivism in portraying and analyzing the diversity of the phenomenon of corruption The approach of social constructivism taken in this volume is able to reconstruct the construction of corruption both from a societal perspective by assessing it as generally accepted or tolerated behaviour in more or less standardized rule governed social situations and from the perspective of actors who perceive corrupt behaviour as problem solving in everyday life The volume proves the usefulness of a social construction perspective for empirical research It contains case studies of social definitions of corruption in eleven European countries that contribute in different ways to establishing a grounded theory of the phenomenon of corruption
