Havet,2019-06-04 No detailed description available for Anthropological and historical sciences Aesthetics and the sciences of art **Kinship and the Social Order** Meyer Fortes,2017-07-12 One of the world s most eminent social anthropologists

draws upon his many years of study and research in the field of kinship and social organization to review the development of anthropological theory and method from Lewis Henry Morgan 1818 1881 to anthropologists of the 1960s It is the central argument of this book that the structuralist theory and method developed by British and American anthropologists in the study of kinship and social organization is the direct descendant of Morgan s researches The volume starts with a re examination of Morgan s work Professor Fortes demonstrates how a tradition of misinterpretation has disguised the true import of Morgan s discoveries He follows with a detailed analysis of the work of Rivers and Radcliffe Brown and the generation of anthropologists inspired by them The author states his own point of view as it has developed in the framework of modern structuralist theory with ethnographic examples examined in depth He shows that the social relations and institutions conventionally grouped under the rubric of kinship and social organization belong simultaneously to two complementary domains of social structure the familial and the political Meyer Fortes contribution to the field of anthropology can best be understood in the context of balance of forces between these domains of the personal and public In the latter part of the book he gives detailed attention to the principal conceptual issues that have confronted research and theory in the study of kinship and social organizations since Morgan s time He shows that kinship institutions are autonomous not mere by products of economic requirements and demonstrates the moral base of kinship in the rule of amity

Kinship, population and social reproduction in the 'new Indonesia' Roy Ellen,2018-05-16 Nuaulu people on the Indonesian island of Seram have displayed remarkable linguistic and cultural resilience over a period of 50 years In 1970 their language and traditional culture was widely considered endangered Despite this Nuaulu have not only maintained their animist identity and shown a robust ability to reproduce traditional ritual performances but have exhibited both population growth

and increasing assertiveness in the projection of their interests through the politics of the New Indonesia This book examines how kinship organization and marriage patterns have responded to some of these challenges and suggests that the retention of core institutions of descent and exchange are the consequence of population growth which in turn has enabled ritual reproduction and thereby effectively maintained a distinct identity in relation to the surrounding majority culture Low conversion rates to other religions and the political consequences of Indonesian reformasi have also contributed to a situation in which despite changes in the material basis of their lives Nuaulu have projected a strong independent identity and organisation In terms of debates around kinship in eastern Indonesia this book argues that older notions of prescriptive social structure are fundamentally flawed Kinship institutions are real enough but the distinction between genealogical and classificatory relations is often unimportant all that matters in the end is that the arrangements entered into between clans and houses permit both biological and social reproduction and that the latter ultimately serves the former An important contribution to the study of the peoples of Eastern Indonesia it highlights a good news story about the successful retention of a traditional way of life in an area that has had a troubled recent history It will be of interest to academics in various fields of anthropology in particular the study of kinship and Southeast Asian societies

The Structure and Sentiment Rodney Needham, 1962 Structure and Sentiment is an important book Reading it may make an anthropologist more keenly aware of certain issues that are crucial in social anthropology and this awareness may make one's field work as well as one's reading of published ethnographies more perceptive F G Lounsbury American Anthropologist A theoretical and methodological essay of first importance As such the book should be of interest to all social scientists interested in the development of specific and general theory in social anthropology Southwestern Social Science Quarterly

Understanding Social Networks Charles Kadushin, 2012-01-02 Understanding Social Networks explains the big ideas that underlie social networks covering fundamental concepts then discussing networks and their core themes in increasing order of complexity

Social Action Systems Thomas J. Fararo, 2001-09-30 Fararo studies general theoretical sociology as a time extended tradition with three phases classical postclassical and recent Employing a process philosophical approach the author seeks to examine these three phases in an effort to provide a synthesis of the theories that seek to lay the foundations of theoretical sociology The author especially focuses on the work of Talcott Parsons and George Homans two contemporary theorists whose common aspiration was to forge a theoretical foundation for sociology that would serve to unify and integrate all theories growing out of sociological research in much the same way that the theory of evolution guides and integrates all other biological theories To begin the author provides a history and overview of the key classical theoretical frameworks from the perspective of process philosophy which he applies to all three phases of the study Fararo then carefully analyzes two major postclassical bodies of general theory namely the evolving and intertwined frameworks of Parsons and Homans from their early theories of social systems to their later divergent perspectives on foundation and synthesis in sociological theory Finally the discussion

turns to the recent phase of general theoretical sociology where more recent foundation strategies rational choice theory and generative structuralism are analyzed in relation to the postclassical phase of the tradition This important and sophisticated new work is essential for all those interested in sociological theory in particular and sociology in general
